Ae Words Level 22 Answer:

Reduplication at the Word Level Haritini Kallergi, 2015-07-24 Contrary to earlier approaches this study suggests that Modern Greek MG is a language that exhibits reduplication in the form of Total Reduplication TR The analysis addresses the morphosyntactic phonological semantic and pragmatic aspects of the types of TR in MG and the constraints and or preferences of speakers concerning their use The typology of TR focuses on four cross linguistically common meanings functions identified as the intensive the contrastive the distributive and the iterative Part of the analysis of these functional types is based on data that come from two experiments with native speakers the one confirms or refines earlier assumptions on to the relation of the above meanings functions with word classes and semantic features of words the other clarifies the idea of prosodic unity in TR and sheds light into various aspects of the relation of intonation with the interpretation of TR constructions Also the formal and lexical constraints on the use of TR are discussed with respect to the status of TR particularly the grammatical lexical opposition In general TR seems to be a borderline case between grammar and the lexicon and a heterogeneous category in that it involves grammatical pragmatic and lexical construction types However the constructions in question meet highly specific criteria for their status as TR types and the process is productive and considerably regularized rule governed in MG In this sense TR should not be merely taken as a strategy for emphasis but should be systematically represented in grammar textbooks
