

## Altium Designer 6 Integration Platform Project

Altium Designer 6 allows you to access all documents related to a design via its user interface. The basic of any design is the **project**. The project links the elements of your design together, including the source schematics, PCB, netlist, any libraries or models you want to keep in the project.

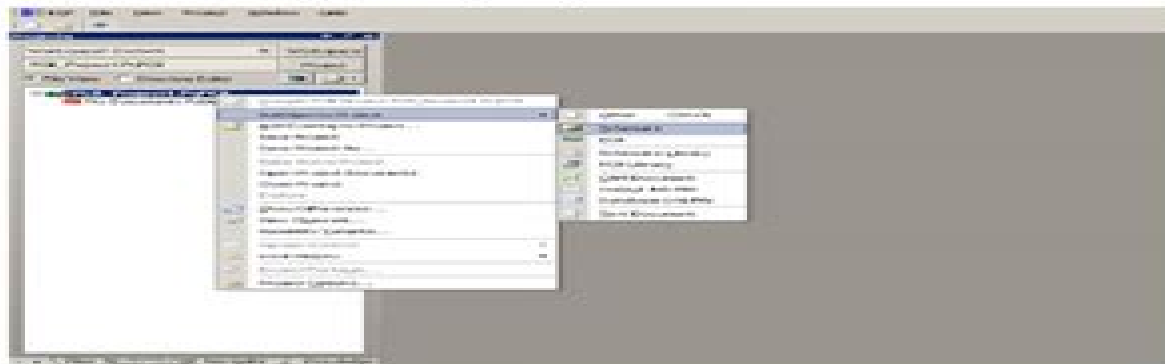

There are different types of project in Altium Designer: **PCB Project**, **FPGA Project**, **Core Project**, **Embedded Projects**, **Script Project** and **Library Packages** (the source for an integrated library). Related project can also be linked under a common Workspace, giving easy access to all files related to a particular design. You can add document to your project, example add Schematic, PCB, Cam Document, PCB Library, Schematic Library, etc.

### Creating a New Project

1. Select the **File>>New>>Project>>PCB** Project menu to create new PCB project.

2. Now add the schematic by right click at project header (PCB\_Project1.PrjPCB) choose **Add New to Project>>Schematic**
