Seamless shade front folds into pleats for a clean, tailored look.

Aerolite Manuals:

Boatbuilding Manual Robert M. Steward, Robert Steward, 1993-12 Boatbuilding Manual is one of the most widely read texts on the subject and it has been used for years as a standard reference at both boatbuilding and design schools. A builder and designer for more than 55 years Robert Steward has rare abilities as a writer and draftsman. His phrasing is clear and easy and he writes the absolute minimum necessary for a complete understanding of the subject. This fourth edition like its predecessors emphasizes traditional wooden construction but also surveys plywood, wood, epoxy, fiberglass, steel, aluminum and other boatbuilding methods. The chapters on interpreting plans, lofting and moldmaking are common to all methods. New to this edition are several chapters arising from the Miscellaneous Details chapter of earlier editions: an appendix on sharpening tools, expanded tables of metric equivalents, an expanded and annotated source guide for plans, fasteners, hardware, wood and other staples of boatbuilding and a list of additional reading. Praise for Boatbuilding Manual: the best building manual for wooden boats there is, clear, concise but inclusive and written so the inexperienced boatbuilder can read it. John Gardner, Mystic Seaport Museum. I first got acquainted with the Boatbuilding Manual in the early 1970s when Murray Peterson, the yacht designer, gave me a copy, saying, "Read this. It's the best book on small boat building I've ever seen." I had to agree and it's still true. Steward's book is in a class of its own. It's the book I always recommend for boatbuilding classes and we've used it to fine advantage at the local high school, Sonny Hodgdon, Hodgdon Yachts Inc, East Boothbay, Maine. This is a book at home in the workshop, not the library. Pulled from beneath a pile of shavings, it is the thing to help make a tough decision or to quiet an unwelcome adviser. The last 150 years have been prolific of discoveries going to enlarge our knowledge of the pre-Hellenic world. First came the original memoirs of the discoverers and decipherers, then great works combining their fruits into connected history and rehandling

the old narratives in their light and now we are having all that condensed and separated from critical apparatus and presented in forms for popular reading and instruction Among works of the latter class this of Lenormant is positively one of the best we have yet seen Its clear and brief narrative contains the latest results of the most advanced Orientalists in their respective fields and the whole is woven together by a scholar whose own life has been devoted successfully to the same round of subjects This is volume two out of two covering the histories of the Medes Persians Phoenicians and Arabians
