Mathematical Psychology Norbert Schwarzer,2024-11-28 A drawback of standard approaches to try and understand the world of feelings such as love hate fear and anger plus consciousness via quantum concepts results from the old problem that Quantum Theory does not appear to be fully compatible with Einstein s General Theory of Relativity To overcome these difficulties we

explicitly tried to avoid pushing any existing theory into the comprehension of the human mind and all its derivatives On the assumption that everything including consciousness may consist of attributes or properties and subjecting them to a general Hamilton extremal principle we surprisingly ended up in generalized Einstein field equations with the whole ensemble having the characteristics of a Quantum Gravity Theory The field of psychology has lacked a unified theory to support phenomenological observations until now and it took a mathematical physicist to find it With example concepts of group think and quantum gravity based human thought processes given among many more it provides a basis for understanding and mitigating and potentially even preventing socioeconomic debt cycles and war and it shows why love can become the black hole in a universe of feelings
