the performance on the stock market as well as the number of employees and their compensation as indicators for its financial situation and the company's success. Looking at the global economy it is clear to see that financial crises are occurring from time to time challenging companies in many ways to innovate and find solutions and get through financially instable times with minimal losses. There are also different types of crises which are weakening especially certain economic sectors. The internet crisis and the corona crisis both had an immense impact on the financial market and the business world. Considering these two crises which are very different or almost contradictory to each other it seems to be interesting to compare the performance of an internet company which began as one of these dot com startups during the internet crisis but is still innovative and successful to this day even during the corona crisis.
