Objectives: You do not need to answer any of the bullets under "Objectives." These are goals to keep in mind as we cover these chapters. At the end of this section, you should be able to:

- Describe the term sustainability as it applies to natural capital and sustainable societies.
- Compare and contrast developing countries and developed countries with regards to population growth, wealth, resource use and pollution.
- Determine the doubling time of any population given the rate of population growth.
- Define the Tragedy of the Commons.
- Cite the benefits of pollution prevention vs. pollution clean-up.
- Identify the root causes of environmental problems.
- Identify the principles of sustainability.
- Calculate the ecological footprint of a country.
- Describe the basic process of the scientific method; formulate and test a hypothesis.
- Identify the main components of a system including inputs, throughputs and outputs and the role of feedback loops.
- Describe synergistic interactions.
- Describe the types and structures of matter including atoms and ions, qualities of matter, states of matter and changes in matter.
- Apply the Law of Conservation of Matter to the outputs of systems.
- Compare and contrast the process of fission and fusion and apply the concept of half-life to radioactive decay.
