

APPROACH Study Webinar

(Asian Patient Perspectives Regarding Oncology Awareness, Care, and Health)

Abstract

As with many countries around the world, countries in Asia have experienced a shift in causes of death from infectious to chronic diseases, resulting in a protracted dying process that the current healthcare infrastructure, particularly in the low- and middle-income countries of the region, is struggling to address. Moreover, these countries do not have the adequate resources or infrastructure to provide the best available treatments or systematic coverage of basic palliative care and home based services. The APPROACH study aims to fill the knowledge gap of understanding advanced cancer patients' quality of life and treatment relative to their expectations in this region. Join us as our speakers share about the different aspects of this study.

Children's Palliative Care: An International Case-Based Manual Julia Downing, 2020-04-01 This manual enables individuals working in children's palliative care (CPC) globally to learn through engaging real world cases. The aim is to provide a clinical case based resource that is globally relevant and accessible to those working in CPC. Drawing on case histories from around the world that reflect key issues and elements of CPC it provides a practical approach grounded in experience. It addresses multidisciplinary care in the management of children and their families, discusses cases from an international perspective and shares examples from a variety of countries utilising cases across a range of ages and conditions demonstrating holistic care. It represents the first case based manual on global CPC and is endorsed and promoted by the International Children's Palliative Care Network (ICPCN). Children's palliative care is a rapidly developing field both in the UK and internationally. The provision of CPC varies considerably with provision often being insufficient and over 65% of countries having no recognised CPC service provision whatsoever. As such while there are an estimated 21.6 million children who require palliative care in many areas of the world CPC is poor or non-existent and children are treated like little adults without their distinctive needs being recognised or understood. There is also a dearth of literature on CPC hence this clinical case based manual fills a gap in the market and is aimed at a global audience making it a unique text in the field.
