Warfare to Lead a Winning Organization Jason A. Santamaria, Vicent Martino, Eric K. Clemons, 2005-06-24 Here are leadership strategies designed for the battlefield adapted to the boardroom using maneuver warfare to lead a winning organization

The Nature of Future Conflict Brian Bond, Mungo Melvin, 1998

Scouts Out! John J. McGrath, 2008 From the Foreword Scouts Out is a wide ranging historical survey of theory doctrine organization and employment of reconnaissance units since the era of mechanization in the early 20th century Reconnaissance and counter reconnaissance are battlefield missions as old as military history itself and missions for which many armies have created specialized units to perform In most cases these units were trained equipped and used differently from the majority of an army's fighting units Horse cavalry performed these missions for centuries for it had speed and mobility far in excess of main battle units Once the horse was replaced by mechanization however the mobility advantage once enjoyed by the horse cavalry disappeared Since the early 20th century the search for the proper mix of equipment the proper organization and the proper employment of reconnaissance units has bedeviled armies around the world This survey uses a diverse variety of historical cases to illustrate the enduring issues that surround the equipping organizing and employment of reconnaissance units

The Luftwaffe James S. Armoured Warfare J. P. Harris, F. H. Toase, 1990 J P Harris and F H Toase present a documented account of armoured warfare worldwide and look towards its future Armoured forces have played dramatic roles in the 20th century and their operations have helped shape today's world This contemporary and wide ranging analysis with contributions by eight experts on military affairs shows what a crucial role armour continues to play today

Encyclopedia of Explosives and Related Items: B Basil Timothy Fedoroff, 1960

Quest for Decisive Victory Robert Michael Citino, 2002 Since the earliest days of warfare military operations have followed a predictable formula after a decisive battle an army must pursue the enemy and destroy its organization in order to achieve a victorious campaign But by the mid 19th century the emergence of massive armies and advanced weaponry and the concomitant decline in the effectiveness of cavalry had diminished the practicality of pursuit producing campaigns that bogged down short of decisive victory Great battles had become curiously indecisive decisive campaigns virtually impossible

Germany and the Axis Powers from Coalition to

Collapse R. L. DiNardo, 2005 It seemed that whenever Mussolini acted on his own it was bad news for Hitler Indeed the Fuhrer's relations with his Axis partners were fraught with an almost total lack of coordination Compared to the Allies the coalition was hardly an alliance at all Focusing on Germany's military relations with Italy Romania Hungary and Finland Richard DiNardo unearths a wealth of information that reveals how the Axis coalition largely undermined Hitler's objectives from the Eastern Front to the Balkans Mediterranean and North Africa DiNardo argues that the Axis military alliance was doomed from the beginning by a lack of common war aims the absence of a unified command structure and each nation's fundamental mistrust of the others Germany was disinclined to make the kinds of compromises that successful wartime partnerships demanded and because Hitler insisted on separate pacts with each nation Italy and Finland often found themselves conducting counterproductive parallel wars on their own DiNardo's detailed assessments of ground naval and air operations reveal precisely why the Axis allies were so dysfunctional as a collective force sometimes for seemingly mundane but vital reasons a shortage of interpreters for example His analysis covers coalition warfare at every level demonstrating that some military services were better at working with their allies than others while also pointing to rare successes such as Rommel's effective coordination with Italian forces in North Africa In the end while some individual Axis units fought with distinction if not on a par with the vaunted Wehrmacht and helped Germany achieve some of its military aims the coalition's overall military performance was riddled with disappointments Breaking new ground DiNardo's work enlarges our understanding of Germany's defeat while at the same time offering a timely reminder of the challenges presented by coalition warfare

The Battle of France and Flanders, 1940 Brian Bond, Michael Donald Taylor, 2001 This collection of essays on the politics and fighting on land sea and in the air will be welcomed by academics and military history enthusiasts Topics covered include preparations of the BEF the failure of allied counter attacks and the air war
