Community Development and Public Administration Theory Ashley E. Nickels, Jason D. Rivera, 2018-04-17 The concept of community development is often misunderstood holding different meanings across different academic disciplines. Moreover the concept of community development has been historically abstracted not only in the way the concept has been conceptualized in academic studies but also by the way in which practitioners use the term in the vernacular. Departing from traditional definitions of community development this volume applies the New Public Service NPS perspective of Public Administration to community development to illustrate how public administrators and public managers can engage in community development planning and implementation that results in more equitable and sustainable long term outcomes. This book will be of interest to practitioners and researchers in public administration management, public administration theory, community development, economic development, urban sociology, urban politics and urban planning.

Why do we need to think about how feminists imagine and actualize their political objectives? This book explores these questions through the notion of oversight, a concept used both to consider what has been overlooked and to examine how particular objects of feminist politics become visible in the first place. Through chapters that focus on realities lived by trans women, Viviane Namaste explores diverse case studies and facets of political life, women's labour, the archiving

Canada is experiencing an unparalleled crisis involving forests and communities across the country. While municipalities, policy makers and industry leaders acknowledge common challenges such as an overdependence on US markets, rising energy costs and lack of diversification, no common set of solutions has been developed and implemented. Ongoing and at times contentious public debate has revealed an appetite and need for a fundamental rethinking of the relationships that link our communities, governments, industrial partners and forests towards a more sustainable future. The creation of community forests is one path that promises to build resilience in forest communities and ecosystems. This model provides local control over common forest lands in order to activate resource development opportunities, benefits and social responsibilities. Implementing community forestry in practice has proven to be a complex task, however there are no road maps or well developed and widely tested models for community forestry in Canada. But in settings where community forests have taken hold, there is a rich and growing body of experience to draw on. The contributors to *Growing Community Forests* include leading researchers, practitioners, Indigenous representatives, government representatives, local advocates and students who are actively engaged in sharing experiences, resources and tools of significance to forest resource communities, policy makers and industry.
