## **Algebras Of Multiplace Functions**

**Algebras of Multiplace Functions** Wieslaw A. Dudek, Valentin S. Trokhimenko, 2012-08-31 This monograph is devoted to various types of algebras of functions with  $n$  variables. It is the first complete monograph in English on this topic covering mainly the Russian literature. It is addressed to all algebraists working in the area of universal algebras, semigroup theory, etc. It is also a useful source of information for graduate and PhD students who are starting their research in this area. The book is the first monograph in the English mathematical literature which provides readers with a very systematical study of the notion of Menger algebras and its generalizations and applications. The results presented here were originally published mostly in the Russian literature. In 2006 the first version of this book was edited in Russian and it is now presented in an extended version where two new and very important chapters are added. The monograph is a broad survey of unknown or little known Russian literature on algebras of multiplace functions and presents to the mathematical community a beautiful and strongly developing theory.

**Proceedings of the International Conference on Algebra 2010** Wanida Hemakul, Sri Wahyuni, Polly Wee Sy, 2012 This volume is an outcome of the International Conference on Algebra in celebration of the 70th birthday of Professor Shum Kar Ping which was held in Gadjah Mada University on 7-10 October 2010. As a consequence of the wide coverage of his research interest and work it presents 54 research papers all original and referred, describing the latest research and development and addressing a variety of issues and methods in semigroups, groups, rings and modules, lattices and Hopf Algebra. The book also provides five well written expository survey articles which feature the structure of finite groups by A. Ballester-Bolinches, R. Esteban-Romero and Yangming Li; new results of Gröbner-Shirshov basis by L.A. Bokut; Yuqun Chen and K.P. Shum; polygroups and their properties by B. Davvaz; main results on abstract characterizations of algebras of  $n$  place functions obtained in the last 40 years by Wieslaw A. Dudek and Valentin S. Trokhimenko; Inverse semigroups and their generalizations by X.M. Ren and K.P. Shum. Recent work on cones of metrics and combinatorics done by M.M. Deza et al is included.
