Alien Landscapes Interpreting Disordered Minds:

Alien Landscapes? Jonathan Glover, 2014-09-02 Do people with mental disorders share enough psychology with other people to make human interpretation possible Jonathan Glover tackles the hard cases violent criminals people with delusions autism schizophrenia to answer affirmatively He offers values linked with agency and identity to guide how the boundaries of psychiatry should be drawn Finding Jesus in the Storm John Swinton, 2020-09-22 People living with mental health challenges are not excluded from God's love or even the fullness of life promised by Jesus Unfortunately this hope is often lost amid the well meaning labels and medical treatments that dominate the mental health field today In Finding Jesus in the Storm John Swinton makes the case for reclaiming that hope by changing the way we talk about mental health and remembering that above all people are people regardless of how unconventionally they experience life Finding Jesus in the Storm is a call for the church to be an epicenter of compassion for those experiencing depression schizophrenia bipolar disorder and related difficulties That means breaking free of the assumptions that often accompany these diagnoses allowing for the possibility that people living within unconventional states of mental health might experience God in unique ways that are real and perhaps even revelatory In each chapter Swinton gives voice to those experiencing the mental health challenges in question so readers can see firsthand what God's healing looks like in a variety of circumstances The result is a book about people instead of symptoms description instead of diagnosis and lifegiving hope for everyone in the midst of the storm

Setting Health-Care Priorities Torbjörn Tännsjö, 2019-06-21 With much of the world's population facing restricted access to adequate medical care how to allocate scarce health care resources is a pressing question for governments hospitals and individuals How do we decide where funding for health care programs should go Tännsjö here approaches the subject from a philosophical perspective balancing theoretical treatments of distributive ethics with real world examples of how health care is administered around the world today Tännsjö begins by laying out several popular ethical theories utilitarianism which recommends maximizing the best overall outcome egalitarianism which recommends smoothing out the differences between people as much as possible and the maximin leximin theory which urges people to give absolute priority to those who are worst off Tännsjö shows how in abstract thought experiments these theories come into conflict with each other and reveal puzzling implications He goes on to argue however that when we consider health care in the real world these theories all agree on a central point in a well ordered welfare state more resources should be directed to the care and cure of people suffering from mental illness and less to the marginal life extension of elderly patients Tännsjö's book thus recommends a shift in spending to increase fairness and overall utility while also recognizing that this kind of dispassionate suggestion with its purely economic foundation is unlikely to take hold in policy Tännsjö's analysis is a case study in how ethical theories can sometimes lead to rational conclusions and recommendations that we are not prepared to accept

Handbook of the Philosophy of Medicine Thomas Schramme, Mary Jean Walker, 2025-09-30 This is the second edition

of Springer's first wide ranging multi authored handbook on philosophy of medicine. It covers the underlying conceptual issues of many important social, political and ethical issues in health care and as such provides a single source of information for this far ranging and still developing field. This new edition of this authoritative handbook includes topics that have gained momentum in the last couple of years. This second edition introduces and develops nearly one hundred topics, concepts and issues in the field. It is written by distinguished specialists from multiple disciplines including philosophy, health sciences, nursing, sociology, political theory and medicine. Many complicated social and ethical issues in health care are based on conceptual problems, most prominently on the definitions of health and disease or on epistemological issues regarding causality or diagnosis. Philosophy is the discipline that deals with such conceptual, metaphysical, epistemological, methodological and axiological matters. This handbook covers all the central concepts in medicine such as ageing, death, disease, mental disorder and well-being. It is an invaluable resource for health care specialists who want to be informed and stay up to date with the relevant discussions as well as philosophers and ethicists with an interest in medicine and members of the general public with an interest in health care and related issues. The text also advances these debates and sets the agenda for years to come.

Varieties of Empathy Elisa Aaltola, 2018-02-09. Empathy is a term used increasingly both in moral theory and animal ethics with the suggestion that empathy enhances our moral ability and agency. Yet its precise meaning is often left unexplored together with the various obstacles and challenges met by an empathy based ethic such as those concerning the ways in which empathy is prone to bias and may also facilitate manipulation of others. These oversights render the contemporary discussion on empathy and animal ethics vulnerable to both conceptual confusion and moral simplicity. The book aims to tackle these problems by clarifying the different and even contradictory ways in which empathy can be defined and by exploring the at times surprising implications the various definitions have from the viewpoint of moral agency. Its main question is: What types of empathy hinder moral ability and what types enable us to become more morally capable in our dealings with the nonhuman world. During the contemporary era when valuable forms of empathy are in decline and the more hazardous self regarding and biased varieties of utilising empathy in the increase this question is perhaps more important than ever.

Can Microfinance Work? Lesley Sherratt, 2016. Can Microfinance Work presents a thorough, going and nuanced ethical assessment of the microfinance industry drawing on the author's expertise in the fields of finance and applied ethics. That comprehensive analysis is then used to ground concrete policy proposals, some quite radical, to improve both microfinance's ethical balance and its overall effectiveness.

Wittgenstein on Other Minds Constantine Sandis, 2025-03-11. The book brings together Constantine Sandis's essays on Wittgenstein's approach to understanding others. Sandis sketches a picture of how his anti-scepticism with regard to the philosophical problem of other minds is not only compatible with but also supported by his scepticism concerning the real life difficulty of understanding others and being understood by them. While each individual essay focuses on particular issues in Wittgenstein including

philosophical anthropology interpersonal psychology and animal concepts they collectively paint a picture of what he takes the real problem of other minds to be how to overcome it and the limitations of our understanding Sandis not only offers a fresh exegesis of Wittgenstein s public and private writings on these matters but proceeds to show the relevance of Wittgenstein beyond the academy *Israelis and Palestinians* Jonathan Glover,2023-12-19 Can Israelis and Palestinians end their long conflict The shocking violence of current events undermines hope as does the long history of peace deals sabotaged by extremists on both sides In this compelling and timely book the eminent moral philosopher Jonathan Glover argues that one vital step towards progress is to better understand the disturbing psychology of the cycle of violence Glover explores the psychological flaws that entrap both sides the urge to respond to wounds or humiliation with backlash political or religious beliefs held with a rigidity that excludes compromise and people s identity being shaped by the conflict in ways that make it harder to imagine or even desire alternatives Drawing on the history of comparable conflicts that eased over time Glover proposes some ways to gradually weaken the grip of this psychology Completed as casualties mounted in the latest political and humanitarian crisis Israelis and Palestinians is essential reading for anyone concerned by the ongoing violence in the Middle East Also available as an audiobook *Alien Landscapes* Jonathan Burke,1955 **Alien Landscapes** John Frederick Burke,1955
