

MICHAEL SORKIN

The background of the cover is a detailed, sepia-toned map of a city grid, likely New York City, showing streets and a river. A large teal oval is superimposed on the map, and a large orange oval is partially visible on the right side. A double-headed vertical arrow points from the teal oval down to the subtitle.

All Over the Map Michael Sorkin, 2013-02-12 Robert Hughes once described Michael Sorkin as unique in America brave principled highly informed and fiercely funny All Over the Map confirms all of these superlatives as Sorkin assaults the national security city with its architecture of manufactured fear *Alvar Aalto and Urban Design* Robert Cody, Angela Amoia, 2025-10-24 This book provides a fresh look at Alvar Aalto's regional and community planning work particularly the ways in which he incorporated sustainability resiliency energy and health and examines how contemporary architects and planners can learn from this approach for the betterment of 21st century urban design and our future cities The Alvar Aalto Atelier planned and promoted regional development that combined ecological features considered density and offered a framework for informality including flexible adaptable infrastructures with physical plans integrating communities with nature These plans were largely suburban and contained vital lessons on how to deal with sprawl traffic landscape energy labor and industry This book analyzes letters writings and drawings not seen outside the Alvar Aalto Foundation to review alternative ways to examine suburban landscapes and urban typologies through sustainability ecology and use of digital technologies This is an essential read for all those interested in the urban design work of Alvar Aalto Written in an accessible way for those new to the work of Aalto Architecture and Urban Design students of all levels will also find this a helpful guide on ecologically and socially responsible design **The Urban Design Reader** Michael Larice, Elizabeth

Macdonald, 2013-05-07 The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of The Urban Design Reader this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends

in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

Play Among Books Miro Roman,Alice _ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science **Rob Wagner's Beverly Hills Script** ,1929 **All about Old Buildings** Diane Maddex,1985 **Callaghan's Illinois Statutes Annotated** Illinois,1929

What Goes Up Michael Sorkin,2018-05-01 A radical architect examines the changing fortunes of the contemporary city Michael Sorkin is one of the most forthright and engaging architectural writers in the world In What Goes Up he takes to task the public officials developers civic organizations and other heroes of big money who have made of Sorkin s beloved New York a city of glittering towers and increasing inequality He unpacks not simply the forms and practices from zoning and political deals to the finer points of architectural design that shape cities today but also offers spirited advocacy for another kind of city reimagined from the street up on a human scale a home to sustainable just and fulfilling neighborhoods and public spaces Informing his writing is a lifetime s experience as an architect and urbanist Sorkin writes of the joys and techniques of observing and inhabiting cities and buildings in order to both better understand and to more happily be in them Sorkin has never been shy about naming names He has been a scourge of design mediocrity and of the supine compliance of starchitects who readily accede to the demands of greed and privilege What Goes Up casts the net wide as he directs his arguments to students professionals and urban citizens with vigor expertise respect and barbed wit *Exquisite Corpse* Michael Sorkin,1991 Exquisite Corpse was a game played by the surrealists in which someone drew on a piece of paper folded it and passed it to the next person to draw on until finally the sheet was opened to reveal a calculated yet random composition In this entertaining and provocative book Michael Sorkin suggests that cities are similarly assembled by many players acting with varying autonomy in a complicit framework An unfolding terrain of invention the city is also a means of accommodating disparity of contextualizing sometimes startling juxtapositions Sorkin s aim is to widen the debate about the

creation of buildings beyond the immediate issues of technology and design He discusses the politics and culture of architecture with daring often devastating observations about the institutions and personalities who have dominated the profession over the past decade Their preoccupation with the empty style of beach houses and Disneyland has consistently trivialized the full constructive scope of contemporary architecture s possibilities Sorkin s interventions range from the development scandals of New York where skyscrapers stand at the intersection between grid and greed through the deconstructivist architectural culture of Los Angeles to the work and ideas of architects developers and critics such as Alvar Aalto Norman Foster Paul Goldberger Michael Graves Coop Himmelblau Philip Johnson Leon Krier Frank Lloyd Wright Richard Rogers Carlo Scarpa James Stirling Donald Trump Tom Wolfe and Lebbeus Woods Throughout Sorkin combines stinging polemic with a powerful call for a rebirth of architecture that is visionary and experimental a recuperated dreamy science Architect and Engineer of California ,1915 **Daniel H. Burnham, Architect, Planner of Cities** Charles

Moore,1921 **The Illustrated London News** ,1924 Civics for Houston ,1928 The American Contractor ,1913
