When Federalism Works Paul E. Peterson, Barry G. Rabe, Kenneth K. Wong, 2010-12-01 Twenty years ago cooperative federalism in the form of federal grant in aid programs administered by state and local governments was applauded almost without reservation as the best means of helping the handicapped the educationally disadvantaged the poor and other groups with special needs More recently these same programs have been criticized for excessive regulations and red tape bureaucratic ineptitude and high cost The criticisms have been used to justify efforts to curb federal domestic spending and terminate many grants in aid In *When Federalism Works* Paul E Peterson Barry G Rabe and Kenneth K Wong examine the new conventional wisdom about federal grants Through documentary research and hundreds of interviews with local state and federal administrators and elected officials they consider the implementation and operation of federal programs for education health care and housing in four urban areas to learn which programs worked when and why Why did rent subsidy programs encounter seemingly endless difficulties while special education was a notable success Why did compensatory education fare better in Milwaukee than in Baltimore Among the factors the authors find significant are the extent to which a program is directed toward groups in need the political and economic circumstances of the area in which it is implemented and the degree of professionalism among those who administer it at all levels of government *When Federalism Works* provides a solid introduction to the most important grant in aid programs of the past twenty years and a thoughtful assessment of where they might be going

National Housing Finance Systems Mark Boleat, 2025-11-18 Originally published in 1985 this book provided a broad review of the range of systems of housing finance used throughout the developed and developing world at the time It surveys the development of housing finance and the ways in which individual countries with different economic structures have coped with the problems of housing finance in periods of severe inflation and fluctuating interest rates The book opens with two theoretical chapters covering housing finance in developed and developing economies The framework developed in these chapters is subsequently used to analyse the systems of various countries Most of the remaining 28 chapters describe housing finance in specific countries Each country study begins with a description of the housing market and then analyses the housing finance market and housing finance institutions The book concentrates on industrialized countries although some chapters cover developing countries including Brazil Colombia South Korea the Philippines and India In addition to the detailed country studies housing finance systems in other countries are described very briefly in a number of general chapters One chapter is concerned specifically with the attempts to integrate housing finance systems in the European Community and two chapters describe the work of international bodies in the housing finance field The book concludes with two chapters one of which compares housing conditions and housing finance

systems and the second considers the study of housing finance A feature of this work is its use of up to date statistics and information For most of the industrialized countries statistics are as at the end of 1983 and where this has not proved possible 1982 figures are used It has not always been possible to use as up to date information for developing countries
