around the undergraduate algorithms course taught by Charles Leiserson at MIT in Spring 1991 we have chosen to organize  
the manual for the second edition according to chapters of the text That is for most chapters we have provided a set of  
lecture notes and a set of exercise and problem solutions pertaining to the chapter This organization allows you to decide  
how to best use the material in the manual in your own course    **Algorithms for Finding Small Solutions** Patrick S.
