Automatic Diatom Identification Automatic Diatom Identification:

Automatic Diatom Identification Hans Du Buf, 2002 This is the first book to deal with automatic diatom identification It provides the necessary background information concerning diatom research useful for both diatomists and non diatomists It deals with the development of electronic databases image preprocessing automatic contour extraction the application of existing contour and ornamentation features and the development of new ones as well as the application of different classifiers neural networks decision trees etc These are tested using two image sets i a very difficult set of Sellaphora pupula with 6 demes and 120 images ii a mixed genera set with 37 taxa and approximately 800 images The results are excellent and recognition rates well above 90% have been achieved on both sets The results are compared with identification rates obtained by human experts One chapter of the book deals with automatic image capture i e microscope slide scanning at different resolutions using a motorized microscope stage autofocusing multifocus fusion and particle screening to select only diatoms and to reject debris This book is the final scientific report of the European ADIAC project Automatic Diatom Identification and Classification and it lists the web sites with the created public databases and an identification demo

Modern Trends in Diatom Identification Gabriel Cristóbal, Saúl Blanco, Gloria Bueno, 2020-05-28 High resolution images of phytoplankton cells such as diatoms or desmids which are useful for monitoring water quality can now be provided by digital microscopes facilitating the automated analysis and identification of specimens Conventional approaches are based on optical microscopy however manual image analysis is impractical due to the huge diversity of this group of microalgae and its great morphological plasticity As such there is a need for automated recognition techniques for diagnostic tools e g environmental monitoring networks early warning systems to improve the management of water resources and decision making processes Describing the entire workflow of a bioindicator system from capture analysis and identification to the determination of quality indices this book provides insights into the current state of the art in automatic identification systems in microscopy
