Research Handbook on Information Law and Governance Sandeen, Sharon K.,Rademacher, Christoph,2021-09-23

This fresh and insightful Research Handbook delivers global perspectives on information law and governance delving into principles of information law in the areas of trade secrecy privacy data protection and cybersecurity Algorithms and the Assault on Critical Thought Nancy Ettlinger,2022-12-30 This book examines the digitalization of longstanding problems of technological advance that produce inequalities and automated governance which relieves subjects of agency and critical thought and prompts a need to weaponize thoughtfulness against technocratic designs The book situates digital era problems relative to those of previous sociotechnical milieux and argues that technical advance perennially embeds corrosive effects on social relations and relations of production recognizing variation across contexts and relative to entrenched societal hierarchies of race and other axes of difference and their intersections Societal tolerance despite abundant evidence for harmful effects of digital technologies requires attention The book explains blindness to social injustice by technocratic thinking delivered through education as well as truths embraced in the data sciences coupled with governance in universities and the private sector that protect these truths from critique Institutional inertia suggests benefits of communitarianism which strives for change emanating from civil society Scaling postcapitalist communitarian values through communitybased peer production presents opportunities However enduring problems require critical reflection continual revision of strategies and active participation among diverse community citizens This book is written with critical geographic sensibilities for an interdisciplinary audience of scholars and graduate and undergraduate students in the social sciences humanities and data sciences

The Handbook for the Future of Work Julie MacLeavy,Frederick Harry Pitts,2024-12-26 The Handbook for the Future of Work offers a timely and critical analysis of the transformative forces shaping work and employment in the twenty first century Focusing on the past two decades the handbook explores how technological advancements automation and a shifting capitalist landscape have fundamentally reshaped work practices and labour relations Beyond simply outlining the challenges and opportunities of automation the handbook integrates these emerging realities with established discussions of work Importantly it moves beyond dominant technology centric narratives probing into broader questions about the nature of capitalism in a time of crisis and the contestation for alternative economic models With contributions from established and emerging authors based in institutions around the world the handbook offers a systematic overview of the developments that have sparked radical shifts in how we live and work and their multifaceted impacts upon social relations and identities practices and sectors politics and environments The handbook is unique in its exploration of the potential for economic transformations to reshape the centrality of work in our social and political imaginaries A useful resource for students and researchers the handbook serves as an essential guide to this new intellectual landscape

Conflict of Laws and the Internet Pedro De Miguel Asensio,2024-05-02 In this thoroughly revised second edition

Pedro De Miguel Asensio presents a practical analysis of jurisdiction choice of law and recognition and enforcement of judgments in the context of online activities examining areas where private legal relationships are most affected by the Internet Addressing the tension between the ubiquity of the Internet and the territorial nature of national legal orders the author sets out the latest developments across multiple jurisdictions in this dynamic field *ECIC2016-Proceedings of the 8th European Conference on Intellectual Capital* Carlo Bagnoli, Chiara Mio, Andrea Garlatti and Maurizio

Massaro,2016-04-21 Markets in the Making Michel Callon,2021-12-07 Slicing through blunt theories of supply and demand Callon presents a rigorously researched but counterintuitive model of how everyday market activity gets produced If you re convinced you know what a market is think again In his long awaited study French sociologist and engineer Michel Callon takes us to the heart of markets to the unsung processes that allow innovations to become robust products and services *Markets in the Making* begins with the observation that stable commercial transactions are more enigmatic more elusive and more involved than previously described by economic theory Slicing through blunt theories of supply and demand Callon presents a rigorously researched but counterintuitive model of market activity that emphasizes what people designing products or launching startups soon discover the inherent difficulties of connecting individuals to things Callon s model is founded upon the notion of singularization the premise that goods and services must adapt and be adapted to the local milieu of every individual whose life they enter Person by person thing by thing Callon demonstrates that for ordinary economic transactions to emerge en masse singular connections must be made Pushing us to see markets as more than abstract interfaces where pools of anonymous buyers and sellers meet Callon draws our attention to the exhaustively creative practices that market professionals continuously devise to entangle people and things *Markets in the Making* exemplifies how prototypes fragile curiosities that have only just been imagined are gradually honed into predictable objects and practices Once these are active enough to create a desired effect yet passive enough to be transferred from one place to another without disruption they will have successfully achieved the status of goods or services The output of this more ample process of innovation as redefined by Callon is what we recognize as the market commercial activity at scale The capstone of an influential research career at the forefront of science and technology studies *Markets in the Making* coherently integrates the empirical perspective of product engineering with the values of the social sciences After masterfully redescribing how markets are made Callon culminates with a strong empirical argument for why markets can and should be harnessed to enact social change His is a theory of markets that serves social critique **Work in the Digital Media and Entertainment**
