Karin Nielsen-Saines

All Madrid 135 Colour Photographs:

Inessential Colors Basile Baudez,2021-12-21 Today architectural plans and drawings are always signposted with colors pink for poch e or exterior walls yellow for certain interior elements and blue for details and ornament How and why did this practice begin The craft of architectural drawing plans sections and details was originally developed during the Italian Renaissance under the influence of engravers The results were correspondingly monochromatic relying on representation through line and perspective But in the 1800s an influx of painters turned architects in Holland and Germany brought color into their designs This innovation eventually spread throughout Europe inspiring French architectural engineers to adopt a common color system in order to more clearly communicate their designs across the kingdom and giving architects another tool with which to impress academic juries and the public In this book author Basile Baudez argues that color was not an essential feature of architectural drawing until European architects adopted a precise system of representation in response to political and artistic rivalry between countries as well as the needs of public exhibitions He shows that French engineers learned to use color from the Dutch colleagues they worked with and then fought against during the Dutch War 1672 78 demonstrating that a color based system was published in French manuals for military engineers and used by royal architects and that architects who wanted to compete with paintings for the public s attention needed to use the familiar language of color This history reveals that color came to have three functions to imitate architectural materials to establish concise representational conventions that could span large geographic distances and to seduce the public including tourists The book will feature a large number of fascinating previously unpublished archival drawings and will contribute to growing interest in the origins and professionalization of architecture as well as the history of drawing as a medium
