published by the Federal Aviation Administration FAA Flight Standards Service AFS with contributions from the National Weather Service NWS The publication began in 1943 as CAA Bulletin No 25 Meteorology for Pilots which at the time contained weather knowledge considered essential for most pilots As aircraft flew farther faster and higher and as meteorological knowledge grew the bulletin became obsolete It was revised in 1954 under a new title The Pilots Weather Handbook and updated again in 1965 In 1975 it was revised under its current title Previous editions have suffered one common problem they dealt in part with weather services that continually change in keeping with current techniques and service demands As a result each edition was somewhat outdated almost as soon as it was published its obsolescence

growing throughout the period it remained in print In 1975 in order to alleviate this problem the authors completely rewrote the AC They streamlined it into a clear concise readable book and omitted all reference to specific weather services Notice This is a printed Paperback version of the Aviation Weather FAA Advisory Circular AC 00 6B FAA Handbooks series Full version All Chapters included This publication is available Electronic version in the official website of the FAA This document is properly formatted and printed as a perfect sized copy 8 5x11
