Quality Auditing J. Mills, 2012-12-06 There are as many views on audits and auditing auditing as there are people who have ever thought about the subject and the process Any author writing about it is faced with some common problems such as how to make a description of a technical process anything less than dry to read How to deal with the general belief that anyone can conduct an audit without any specific training or experience Auditing is often viewed as a waste of time money and resources with little if any real value to an organization It is seen as something of a judgemental process People see themselves as being under scrutiny and examination and as very few of us enjoy such a process audits are not generally welcomed at first I cannot claim to have found solutions to these problems or to have come up with an easy five minute way of understanding the detailed points that make up this whole subject As with any form of technical textbook this work must not be viewed as a volume to be read in one sitting from cover to cover but used to dip into as and when required Thankfully the practice of auditing in real life has compensations for those involved Those being audited the auditees if sensible will be able to learn from what is hoped will be an objective and skilled overview of the areas and subjects being audited
