Brouwer - Topologist,**

Intuitionist, Philosopher Dirk van Dalen, 2012-12-04 Dirk van Dalen's biography studies the fascinating life of the famous Dutch mathematician and philosopher Luitzen Egbertus Jan Brouwer Brouwer belonged to a special class of genius complex and often controversial and gifted with a deep intuition he had an unparalleled access to the secrets and intricacies of mathematics Most mathematicians remember L. E. J. Brouwer from his scientific breakthroughs in the young subject of topology and for the famous Brouwer fixed point theorem Brouwer's main interest however was in the foundation of mathematics which led him to introduce and then consolidate constructive methods under the name intuitionism This made him one of the main protagonists in the foundation crisis of mathematics As a confirmed internationalist he also got entangled in the interbellum struggle for the ending of the boycott of German and Austrian scientists This time during the twentieth century was turbulent nationalist resentment and friction between formalism and intuitionism led to the Mathematische Annalen conflict The war of the frogs and the mice It was here that Brouwer played a pivotal role The present biography is an updated revision of the earlier two volume biography in one single book It appeals to mathematicians and anybody interested in the history of mathematics in the first half of the twentieth century Mathematical Logic Petko P. Petkov, 2012-12-06 Heyting 88 Summer School and Conference on Mathematical Logic held September 13-23 1988 in Chaika Bulgaria was honourably dedicated to Arend Heyting's 90th anniversary It was organized by Sofia University Kliment Ohridski on the occasion of its centenary and by the Bulgarian Academy of Sciences with sponsorship of the Association for Symbolic Logic The Meeting gathered some 115 participants from 19 countries The present volume consists of invited and selected papers Included are all the invited lectures submitted for publication and the 14 selected contributions chosen out of

56 submissions by the Selection Committee The selection was made on the basis of reports of PC members an average of 4 per submission All the papers are concentrated on the topics of the Meeting Recursion Theory Modal and Non classical Logics Intuitionism and Constructivism Related Applications to Computer and Other Sciences Life and Work of Arend Heyting I am pleased to thank all persons and institutions that contributed to the success of the Meeting sponsors Programme Committee members and additional referees the members of the Organizing Committee our secretaries K Lozanova and L Nikolova as well as K Angelov V Bozhichkova A Ditchchev D Dobrev N Dimitrov R Draganova G Gargov N Georgieva M Janchev P Marinov S Nikolova S Radev I Soskov A Soskova and v Sotirov who helped in the organization Plenum Press and at last but not least all participants in the Meeting and contributors to this volume **Handbook of Spatial**

Logics Marco Aiello, Ian Pratt-Hartmann, Johan van Benthem, 2007-09-04 The aim of this handbook is to create for the first time a systematic account of the field of spatial logic The book comprises a general introduction followed by fourteen chapters by invited authors Each chapter provides a self contained overview of its topic describing the principal results obtained to date explaining the methods used to obtain them and listing the most important open problems Jointly these contributions constitute a comprehensive survey of this rapidly expanding subject Handbook of Constructive

Mathematics Douglas Bridges, Hajime Ishihara, Michael Rathjen, Helmut Schwichtenberg, 2023-05-11 Gives a complete overview of modern constructive mathematics and its applications through surveys by leading experts **The Axiomatic Method with Special Reference to Geometry and Physics** Leon Henkin, Alfred Tarski, 1959 Fuzzy Logic and Mathematics Radim Belohlavek, Joseph W.
