

ROVER B

ROVER B

Biesse presents the new solution for manufacturing to high standards of quality and flexibility. Rover B is the new range of machining centres designed to satisfy the needs of the smaller stand-alone businesses who require versatility, accuracy and speed. State of the art technology and common parts taken from our top of the range Rover machines are used on this cost effective, well designed range, that can deliver high out-put from a relatively small footprint. Rover B brings to the craftsman the ability to mass produce one-offs at an affordable level in an increasingly competitive solid wood and panel industry.

WORK TABLE

Rover B can be fitted with the CTS (Classic Table Setting System) or ATS (Advanced Table Setting System) work table. Both these solutions allow the work tables to be moved on round bars and pneumatically locked. The suction devices are interchangeable and can be turned, tooling time is reduced thanks to the display of the suction device positions. The CTS table allows fast, practical mechanical locking of the carriages on the tables, simply using a lever at the bottom of the device. For higher performance and greater versatility, Rover B can be fitted with the ATS (Advanced Table Setting System) work table, which allows efficient locking of panels of all shapes and sizes. Rover B can be fitted with a wide range of different panel locking devices, and with the ATS table Rover B can also be equipped with Uniclamp locking devices for narrow elements, used when machining door and window frames. Greater flexibility, speed and practicality are the characteristics brought by the ATS work table to the Rover B range of processing centres.
