American Blockbuster Charles R. Acland, 2020-07-24 *Ben Hur* 1959 *Jaws* 1975 *Avatar* 2009 *Wonder Woman* 2017 the blockbuster movie has held a dominant position in American popular culture for decades In American Blockbuster Charles R Acland charts the origins impact and dynamics of this most visible entertaining and disparaged cultural form Acland narrates how blockbusters emerged from Hollywood's turn to a hit driven focus during the industry's business crisis in the 1950s Movies became bigger louder and more spectacular They also became prototypes for ideas and commodities associated with the future of technology and culture accelerating the prominence of technological innovation in modern American life Acland shows that blockbusters continue to be more than just movies they are industrial strategies and complex cultural machines designed to normalize the ideologies of our technological age

Streaming, Sharing, Stealing Michael D. Smith, Rahul Telang, 2017-08-25 How big data is transforming the creative industries and how those industries can use lessons from Netflix Amazon and Apple to fight back The authors explain gently yet firmly exactly how the internet threatens established ways and what can and cannot be done about it Their book should be required for anyone who wishes to believe that nothing much has changed *The Wall Street Journal* Packed with examples from the nimble footed who reacted quickly to adapt their businesses to laggards who lost empires *Financial Times* Traditional network television programming has always followed the same script executives approve a pilot order a trial number of episodes and

broadcast them expecting viewers to watch a given show on their television sets at the same time every week. But then came Netflix's *House of Cards*. Netflix gauged the show's potential from data it had gathered about subscribers' preferences, ordered two seasons without seeing a pilot and uploaded the first thirteen episodes all at once for viewers to watch whenever they wanted on the devices of their choice. In this book, Michael Smith and Rahul Telang, experts on entertainment analytics, show how the success of *House of Cards* upended the film and TV industries and how companies like Amazon and Apple are changing the rules in other entertainment industries, notably publishing and music. We're living through a period of unprecedented technological disruption in the entertainment industries. Just about everything is affected: pricing, production, distribution, piracy. Smith and Telang discuss niche products and the long tail, product differentiation, price discrimination, and incentives for users not to steal content. To survive and succeed, businesses have to adapt rapidly and creatively. Smith and Telang explain how. How can companies discover who their customers are, what they want, and how much they are willing to pay for it? Data. The entertainment industries must learn to play a little moneyball. The bottom line: follow the data.

**Sino-Enchantment** Andrew Stuckey, Kenneth Chan, 2021-04-06. Although Chinese film audiences have always maintained a foundational cultural interest in the fantastic, this trend has dramatically increased over the last decade. *Sino-Enchantment* is the first work in English to approach this recent explosion of fantastic film in Chinese cinemas, where each re-envisioning of the form is determined by cultural, economic, political, and technological factors to produce fresh inventions and creative reinventions of familiar narratives, characters, and tropes. With case studies of films such as *The Assassin* (2015), *Monster Hunt* (2015), and *The Great Wall* (2016), this novel approach uses the framework of Sino-enchantment as a new theoretical lens through which readers can engage with elements of the fantastic in Chinese cinema.

**Animating Unpredictable Effects** Jordan Gowanlock, 2021-05-28. Uncanny computer-generated animations of splashing waves, billowing smoke clouds, and characters flowing hair have become a ubiquitous presence on screens of all types since the 1980s. This Open Access book charts the history of these digital moving images and the software tools that make them. *Unpredictable Visual Effects* uncovers an institutional and industrial history that saw media industries conducting more private R&D as Cold War federal funding began to wane in the late 1980s. In this context, studios and media software companies took concepts used for studying and managing unpredictable systems like markets, weather, and fluids, and turned them into tools for animation. *Unpredictable Visual Effects* theorizes how these animations are part of a paradigm of control evident across society while at the same time exploring what they can teach us about the relationship between making and knowing.
