Cady,2006 **Emergency Medical Services** ,2002 **Publications Combined: Counter-Narcotics and Terrorism Operational Medical Support (CONTOMS) TACTICAL MEDIC HANDBOOK & TACTICAL EMERGENCY MEDICAL SUPPORT (TEMS) PROTOCOLS** U. S. Government , Disclaimer These guidelines were developed as a reference for the Counter Narcotics and Terrorism Operational Medical Support CONTOMS Program The guidelines and protocols provided in this manual are based on the most current information available at the time of publication Every effort has been made to ensure the accuracy of this information but the CONTOMS Program cannot be responsible for discrepancies or typographical errors Since medical practice is continually evolving providers are reminded to remain cognizant of the most current practices that may revise or replace the approach adopted in this publication Providers are also cautioned not to rely on this manual as a sole source of information about patient care but rather to tailor their therapy to the clinical context and to consult medical control for any concerns Foreword These protocols are issued by the Office of Health Affairs of the Department of Homeland Security DHS These protocols are for the use of licensed Emergency Medical Service EMS providers authorized to provide medical care in the Department The protocols contained within this text are the Standard of Care within those areas regulated under DHS These protocols outline and

define the expected level of care that should be administered to patients treated by approved DHS EMS providers. These combined protocols create a dynamic document that must be applied relevant to individual patient presentations and situations. An individual patient may require the application of a single protocol, a portion of a protocol or a combination of several protocols in order to adequately treat the patient's condition. It is the expectation of DHS OHA that providers utilize the protocols patient assessment and clinical findings cooperatively to establish a treatment plan for each patient. These protocols provide for patient care capabilities identified as acceptable protocols by the Office of Health Affairs and approved for adoption by DHS agency EMS programs. Program Medical Director approval and approved training and skills testing are required for these protocols to be adopted and available for use. Specific components of the protocols therefore may not be available to all DHS personnel. The scope of the medication and equipment is defined by operational capabilities and are approved by the Program Medical Director.

**Conveyor Project**, 2009      **Emergency**, 1997      **Practicing Archaeology** Thomas W. Neumann, Robert M. Sanford, Mary Spink Neumann, 2022-08-15 This comprehensive text and reference book addresses the questions and problems of cultural resources archaeology for undergraduate and graduate students and practicing archaeologists. Neumann, Sanford and Neumann use their decades of field experience to discuss in great detail the complex processes involved in conducting a cultural resources management (CRM) project. Dealing with everything from law to logistics, archival research to artifact analysis, project proposals to report production, they provide an invaluable sourcebook for archaeologists who do contract archaeology. After introducing the legal and ethical aspects of CRM and stakeholder engagement, the authors describe the processes of designing a proposal and contracting for work, doing background research, conducting assessment, testing, mitigation work, Phase I, II and III laboratory analysis, and preparing reports for project sponsors. The volume's emphasis on practical problems, use of extensive examples, and detailed advice on a host of subjects make it an ideal manual for archaeologists and field schools. This revised and expanded third edition of Practicing Archaeology: A Manual for Cultural Resources Archaeology updates Federal and state contracting protocols and covers preparing safety plans for occupational hazards, organization of an archaeology laboratory, use of electronic technology and digital media, advice on field and personnel management, and how to make a living doing cultural resources archaeology.
