**Ordnance Manual (war)**. Great Britain. War Office,1910    *Asphalt Pavement Performance under Complex Service Conditions* Leilei Chen,Nicholas Thom,Linglin Li,2025-10-24 Asphalt pavement is essential infrastructure for roads bridges and airports However asphalt often experiences weakened mechanical properties and poor interfacial adhesion when subjected to complex service conditions leading to frequent damage Furthermore secondary damage frequently occurs after maintenance leading to costly repairs and negative impacts on operational efficiency and safety Thus it is essential to develop effective prevention and control measures through an improved understanding of the failure mechanism of asphalt pavement under complex service conditions and extend its service life As technological advancements continue to improve pavement performance and extend the lifetime of pavement materials researchers and technologists must address the combined effects of various stress factors including water and load temperature and load and other comprehensive water temperature load effects This challenge presents an exciting opportunity to improve pavement field practices and better understand the

performance of asphalt pavement under more demanding service conditions Therefore this Research Topic aims to investigate the performance of asphalt pavement under complex service conditions We welcome submissions that explore the following topics of interest but are not limited to Advanced equipment and methods for complex service conditions Numerical modeling of complex service conditions Multiscale investigation of asphalt materials Development of high performance asphalt pavement materials Performance evaluation and prediction Maintenance materials and schemes
