and then discusses current media pedagogical and media didactic approaches. Later in the book the authors develop didactic perspectives on various methods these include internet based archive work and the use of digital teaching materials. They also deal with current questions regarding religious education such as inclusion and cyber bullying etc. Finally they identify some of the main didactic challenges for religious instruction in a mediatized world. This volume is a plea for a wider understanding of education and is based in part on a German Swedish teaching and research cooperation. Following this example it focuses on a future oriented networking of plural forms of education. This resource is designed for students of theology and religious sciences as well as for religious education teachers.
