## Aids Sexual Behavior And Intravenous Drug Use:

**AIDS, Sexual Behavior, and Intravenous Drug Use** National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on AIDS Research and the Behavioral, Social, and Statistical Sciences, 1989-02-01 The AIDS virus is spread by human behaviors enacted in a variety of social situations. In order to prevent further infection we need to know more about these behaviors. This volume explores what is known about the number of people infected, risk associated behaviors, facilitation of behavioral change and barriers to more effective prevention efforts. AIDS National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on AIDS Research and the Behavioral, Social, and Statistical Sciences, 1990-02-01 Expanding on the 1989 National Research Council volume AIDS Sexual Behavior and Intravenous Drug Use, this book reports on changing patterns in the distribution of cases and the results of intervention efforts under way. It focuses on two important subpopulations that are becoming more and more at risk: adolescents and women. The committee also reviews strategies to protect blood supplies and to improve the quality of surveys used in AIDS research. AIDS: The Second Decade updates trends in AIDS cases and HIV infection among the homosexual community, intravenous drug users, women, minorities, and other groups; presents an overview of a wide range of behavioral intervention strategies directed at specific groups; discusses discrimination against people with AIDS and HIV infection; and presents available data on the proportion of teenagers engaging in the behaviors that can transmit the virus and on female prostitutes and HIV infection. **AIDS**, 1989 *AIDS, the Second Decade* Charles F. Turner, Heather G. Miller, Lincoln E. Moses, 1990-01 The AIDS epidemic in the second decade: 2. Prevention: the continuing challenge; 3. AIDS and adolescents; 4. Interventions for female prostitutes; 5. AIDS and the blood supply; 6. Methodological issues in AIDS surveys. AIDS Charles F. Turner, Heather G. Miller, Lincoln E. Moses, 1989 **AIDS**, 1989 *Handbook on Risk of AIDS* Barry S. Brown, George M. Beschner, 1993-10-11 Intravenous drug users account for nearly one third of the current AIDS cases in the United States, second only to gay males and are responsible for 72 percent of female and 59 percent of pediatric cases of AIDS. Thus the National Institute of Drug Abuse launched a major effort in 1987 to locate hidden users and to see how they function and to evaluate strategies and community based programs in 50 cities and 60 nearby communities around the country in order to lower risks to IV users and to reduce the dangers that they pose to others in the population. Brown and Beschner present the very latest findings and come to well tested conclusions about how to change behaviors positively. This handbook is written for use in college, university and professional libraries and for students, teachers, policymakers and practitioners in public health service and in public policy at all governmental levels to study carefully. Brown and Beschner open with an introduction showing how injection drug users and their sexual partners are at risk for AIDS. Part I describes the spread of AIDS in the United States and Puerto Rico. Part II depicts patterns of injection drug and crack use and their effect on sex.

partners Part III deals with gender issues Part IV goes into demographic and background factors Part V discusses key issues in the use of drug abuse treatment Part VI analyzes outreach and behavior change strategies And Part VI looks into how risk can be reduced as a result of outreach and specific intervention strategies The final chapter comes to some conclusions about the effectiveness of various interventions by the National AIDS Demonstration Research Project Background readings also add to the importance of this major reference

**Use** C. G. Leukefeld, Robert J. Battjes, Z. Amsel, 2013-01-11 Suggests that the intervention to help intravenous drug users to modify their behaviour to reduce the risk of AIDS infection should be community based this being the best way to affect the behaviour of people who decide not to avail themselves of the services of drug treatment centres

**AIDS and Intravenous Drug Use** M. Daniel Fernando, 1993-06-21

The name AIDS is an accusation It implies punishment for sin homosexuality and promiscuity AIDS is a moral judgement masquerading as a scientific name which is at the very heart of discrimination against the infected At the bottom are drug users victims of the War On Drugs condemned to contract AIDS by using contaminated syringes necessitated by scarcity resulting from restrictive policies A rational way to control HIV is to liberalize drug paraphernalia policies as in Europe The U S has not taken this simple step thus unleashing the AIDS epidemic among drug users their sexual partners and neonates While this policy neglect can be understood in the context of AIDS prevention dominated by moral political and religious ideologies rather than epidemiological facts there are critical racial implications The ethnic divide separating the white researchers and the infected who belong to minorities has fuelled comparisons of AIDS with the infamous Tuskegee Syphilis Study and some preventive strategies have been called genocidal plots Recent research indicating the ineffectiveness of bleach to disinfect

paraphernalia has exposed the deadly consequences of a nonchalant attitude to research and compromises for political expediency     **AIDS Sexual Behavior and IV Drug Use** National Research Council (U.S.),1989     **California.
