Astonishing Spirit Don Eliot, 2021-12-06 Forty six years of it That's the time period that this work covers Often consistently the same though occasionally bizarre this writer has found the events of Pentecost of 2000 years ago continuing in our world today Mankind's primal drive finds God the Spirit in the author's experience quite willing to reveal His presence in increments as the soul grows more receptive That's what this is about and the satisfaction is deep and fulfilling and probably available to all Here's hoping this work may serve as encouragement to other thirsty travelers in life and that you too will find the ensuing reality of the spiritual that is at the basis of all of us

The Eye of War Antoine Bousquet, 2018-10-09 How perceptual technologies have shaped the history of war from the Renaissance to the present From ubiquitous surveillance to drone strikes that put warheads onto foreheads we live in a world of globalized individualized targeting The perils are great In The Eye of War Antoine Bousquet provides both a sweeping historical overview of military perception technologies and a disquieting lens on a world that is increasingly one in which anything or anyone that can be perceived can be destroyed in which to see is to destroy Arguing that modern day global targeting is dissolving the conventionally bounded spaces of armed conflict Bousquet shows that over several centuries a logistical order of militarized perception has come into ascendancy bringing perception and annihilation into ever closer alignment The efforts deployed to evade this deadly visibility have correspondingly intensified yielding practices of radical concealment that presage a wholesale disappearance of the customary space of the battlefield Beginning with the Renaissance's fateful discovery of linear perspective The Eye of War discloses the entanglement of the sciences and

techniques of perception representation and localization in the modern era amid the perpetual quest for military superiority In a survey that ranges from the telescope aerial photograph and gridded map to radar digital imaging and the geographic information system Bousquet shows how successive technological systems have profoundly shaped the history of warfare and the experience of soldiering A work of grand historical sweep and remarkable analytical power The Eye of War explores the implications of militarized perception for the character of war in the twenty first century and the place of human subjects within its increasingly technical armature
