Caiazza,2013-05-01 The universe is not a machine that operates with the same set of rules but rather a living growing organism that can be viewed in two ways one can admire the intricacy of the cosmological process on the physical chemical and astronomical levels or one can look at this process as a result of design or providence These two options should not preclude each other John C Caiazza asserts we should instead look closely at what science reveals about design This volume offers an opportunity to reconcile the thinking of those who hold to traditional religious views on the origins of the universe and those who look to scientific explanations Religion and science are both ways of giving moral and intellectual order to the universe enabling mankind to cope with a chaotic universe and live well Both sharp contemporary sensitivity to individual opinions and protection of the individual from social control Both science and religion share a sense that postmodern culture lacks structure John C Caiazza shows how renewed attention to religious and scientific insights can resolve longstanding conflicts providing postmodern society with a vision of tolerable order Book jacket
