Light, 2014-09-26 Ben Light puts forward an alternative way of thinking about how we engage with social networking sites He analyses our engagements social networking sites in public at work in our personal lives and as related to our health and wellbeing emphasizing the importance of disconnection instead of connection **Disconnecting Sovereignty** Mariavittoria Catanzariti, 2024-08-07 This book explores the dynamic legal semantics of territory as applied to data It offers a theoretical assessment of the legal challenges that data flows pose for the principle of territoriality and for state sovereignty more generally The concept of sovereignty has traditionally developed in close connection with the exercise of powers over a territory and ideas of jurisdiction have always been based on the principle of territoriality Digitalization questions however the very idea of physical frontiers Interconnected networks make data in effect borderless Data can in fact be created stored processed and accessed anytime and from anywhere The idea of the book is upbeat the law can keep pace with the ability of data to fragment reality The condition for this is that sovereignty disconnects from territory Disconnection is not getting rid of the territory once and for all it only means that for data alternatives to the territorial connection exist The analysis focuses on data from a holistic perspective personal and nonpersonal with the aim of investigating divergent and convergent solutions provided by different branches of the law data protection IP law international law and fundamental rights protection It assesses in particular the relationships between digitalization and the principle of territoriality focusing on the specific legal aspects the connections between law and
