Delusive Speech in the Sharing Economy Julie Reid, 2025-03-04. In this examination of how the rise of online sharing economy platforms has facilitated online crime, this book shows how while marketed as trustworthy peer-to-peer services, these platforms are highly vulnerable to misuse by scammers and are used for the dissemination of delusive speech. The analysis centres around the concept of delusive speech, a sub-set of disinformation designed to deceive and motivate by criminal intent. Looking beyond the economic and disruptive impacts of sharing economy platforms like Uber, Airbnb, and others, this book situates these Big Tech giants as mass communication channels that are frequently misused by bad actors to distribute dangerous content globally. Drawing from over 600 cases of victims lured into scams or physical danger via misleading Airbnb listings, the book provides a detailed case study exposing Airbnb's failure to establish legitimate safety measures despite branding its platform as a community of trust. Incorporating netnography and thematic analysis, the author theorises the deceptive semiotic structure of delusive speech and evaluates practical mechanisms Airbnb could employ to prevent scams and crime on its platform. With a global audience including researchers in communication and media studies, digital media, and media industries, as well as tech journalists, Silicon Valley critics, policymakers, and digital rights advocates, this book unmasks how sharing economy giants like Airbnb contribute to an epidemic of online deception causing real-world harm.

Platform as a Rule Maker Jian Jia, 2021. Digital platforms are not only match-making intermediaries but also establish internal rules that govern all users in their ecosystems. To better understand the governing role of platforms, we study two Airbnb pro-guest rules that pertain to guest and host cancellations using data on Airbnb and VRBO listings in 10 US cities. We demonstrate that such pro-guest rules can drive demand and supply to and from the platform as a function of the local platform competition between Airbnb

and VRBO Our results suggest that platform competition sometimes dampens a platform wide pro guest rule and sometimes reinforces it often with heterogeneous effects on different hosts This implies that platform competition does not necessarily mitigate a platform s incentive to treat the two sides asymmetrically and any public policy in platform competition must consider its implication on all sides
