 the natural progression of cars replacing horses on the streets and on the racetrack automobile racing flourished as a sport  
 for many years in the United States before stock car racing truly came into its own in the 1950s The economy rebounded  
 after the end of World War II The GIs brought home skills and knowledge about advances in technology and civilians had  
 learned how to get the most out of old machines during the war Scrap steel was no longer reserved exclusively for the War  
 Effort and the junkyards were filling up with worn out cars as people started to invest in new ones to replace them A very  
 competitive stock car could be purchased at the junk yard for 25 or so By adding another 75 a clever builder could make it  
 race ready Teams of weekend warriors could compete head to head against well funded highly trained teams and have a real  
 shot at winning It was a perfect combination knowledgeable mechanics and fearless drivers in cars that the public  
 recognized from their daily life The grandstands filled and new tracks turned up all across the countryside to satisfy the  
 public s interest in watching these race cars compete Associations formed to standardize the tracks which were often farm  
 fields that had been lovingly sculpted and paved by the farmers themselves to give the drivers and their crews a place to  
 showcase their talent These men and women entertained awed and inspired a generation of motor heads and race fans This
