Beyond Aspect Expression Discourse Typological:

Studies in the Grammar and Lexicon of Neo-Aramaic Geoffrey Khan, Paul M. Noorlander, 2021-01-15 The Neo Aramaic dialects are modern vernacular forms of Aramaic which has a documented history in the Middle East of over 3 000 years Due to upheavals in the Middle East over the last one hundred years thousands of speakers of Neo Aramaic dialects have been forced to migrate from their homes or have perished in massacres As a result the dialects are now highly endangered The dialects exhibit a remarkable diversity of structures Moreover the considerable depth of attestation of Aramaic from earlier periods provides evidence for pathways of change For these reasons the research of Neo Aramaic is of importance for more general fields of linguistics in particular language typology and historical linguistics The papers in this volume represent the full range of research that is currently being carried out on Neo Aramaic dialects They advance the field in numerous ways In order to allow linguists who are not specialists in Neo Aramaic to benefit from the papers the examples are fully glossed

A typology of questions in Northeast Asia and beyond Andreas Hölzl, 2018-08-29 This study investigates the distribution of linguistic and specifically structural diversity in Northeast Asia NEA defined as the region north of the Yellow River and east of the Yenisei In particular it analyzes what is called the grammar of questions GQ i.e. those aspects of any given language that are specialized for asking questions or regularly combine with these The bulk of the study is a bottom up description and comparison of GQs in the languages of NEA The addition of the phrase and beyond to the title of this study serves two purposes First languages such as Turkish and Chuvash are included despite the fact that they are spoken outside of NEA since they have ties to or even originated in the region Second despite its focus on one area the typology is intended to be applicable to other languages as well Therefore it makes extensive use of data from languages outside of NEA The restriction to one category is necessary for reasons of space and clarity and the process of zooming in on one region allows a higher resolution and historical accuracy than is usually the case in linguistic typology The discussion mentions over 450 languages and dialects from NEA and beyond and gives about 900 glossed examples The aim is to achieve both a cross linguistically plausible typology and a maximal resolution of the linguistic diversity of Northeast Asia
