Strategies for Success in Musical Theatre Herbert D. Marshall,2016-09-05

In *Strategies for Success in Musical Theatre* veteran musical director and teacher Herbert Marshall provides an essential how to guide for teachers or community members who find themselves in charge of music directing a show. Stepping off the podium Marshall offers practical and often humorous real world advice on managing auditions organizing rehearsals working with a choir choreographer and leads how to run a sitzprobe a technical rehearsal and a dress rehearsal how to manage the cast and crew energy for a successful opening night and ways to end the experience on a high note for all involved. Throughout the book Marshall emphasizes the importance of learning through performance and the beauty of a group united in a common goal. In doing so he turns what can appear as a never ending list of tasks and demand for specialized knowledge into a manageable educational and ultimately engaging and fun experience for all. Because the techniques in Marshall's book have been thoroughly workshopped and classroom tested they are based in proven pedagogy and will be of particular use for the music director in acting as a teaching director someone imparting theatrical knowledge to his or her cast and production staff. Marshall provides both extended and abbreviated timelines flexible to fit any director's needs. Marshall's book is a greatly beneficial resource for music education students and teachers alike giving an insightful glimpse into the range of possibilities within a music educator's career. Musicians and actors with varying levels of skill and experience will be able to grow simultaneously through Marshall's innovative teaching plans. Through collaborative techniques steps in the book serve to educate both director and student. Thoroughly illustrated with charts diagrams and scores *Strategies for Success in Musical Theatre* is an ideal companion for all who work with school and community based musical theater productions.

Web Based Energy Information and Control Systems Barney L. Capehart,Lynne C. Capehart,2021-01-07 Advances in new equipment new processes and new technology are the driving forces in improvements in energy management energy efficiency and energy cost control. The purpose of this book is to document the operational experience with web based systems in actual facilities and in varied applications and to show how new opportunities have developed for energy and facility managers to quickly and effectively control and manage their operations. You'll find information on what is actually happening at other facilities and see what is involved for current and future installations of internet based technologies. The case studies and applications described should greatly assist energy facility and maintenance managers as well as consultants and control systems development engineers.
