

ANIMAL ALTERITY

SCIENCE FICTION AND THE QUESTION OF THE ANIMAL

Animal Alterity uses readings of science fiction texts to explore the centrality of animals for our ways of thinking about being human. It argues that the academic field of animal studies and the popular genre of science fiction share a number of critical concerns: thinking about otherness and the nature of human being; desiring communication across species difference; and interrogating the social and ethical consequences of changes in science and technology.

We are living in a complex set of contradictory and conflicting relations with non-human animals. This book maps this complex terrain, arguing that we are better able to perceive options for a transformed politics if we perceive our various material relations with non-human animals within a deeper understanding of the functions of the category 'animal'.

'This book challenged my thinking and extended my reading pleasure, and you can't ask for more than that.'

Professor Philip Armstrong, Co-director, New Zealand Centre for Human-Animal Studies, University of Canterbury

'Animal Alterity is an engaging, intelligent study which is perceptively and accessibly theorised, and refreshingly innovative.'

Dr Peter Wright, Edge Hill University

Animal Alterity Science Fiction And The Question Of The Animal:

Animal Alterity Sherryl Vint, 2010-01-01 *Animal Alterity* uses readings of science fiction texts to explore how animals are central to our perception of humanity. Arguing that the academic field of animal studies and the popular genre of science fiction share a number of critical concerns, Sherryl Vint expresses an urgent need to reconsider the human-animal boundary in a world of genetic engineering, factory farming, species extinctions, and increasing evidence of animal intelligence, emotions, and tool use. Mapping the complex terrain of human relations with non-human animals, this book offers an important intervention into the contentious ongoing discussions of the post-human.

Gender and Sexuality in Critical Animal Studies Amber E. George, 2021-03-24 *Gender and Sexuality in Critical Animal Studies* explores nonhuman animals' experiences of gender, physiological sex, and sexuality while in nature and captivity. The contributors analyze nonhuman oppression issues such as reproductive freedom, deconstructing dichotomous thinking, and promoting animal liberation within and beyond the academy. The scholar-activists featured in this collection investigate injustice in news stories, literature, and other media that shape human perceptions and treatment toward nonhumans. Each chapter confronts problematic social constructions of gender, physiological sex, or sexuality by applying literary theory, cultural studies, disability studies, queer studies, ecocriticism, and more to promote justice and equity for nonhuman animals.

Doing Animal Studies with Androids, Aliens, and Ghosts David P. Rando, 2023-04-06 Exploring what can be learnt when literary critics in the field of animal studies temporarily direct attention away from representations of nonhuman animals in literature and towards liminal figures like androids, aliens, and ghosts, this book examines the boundaries of humanness. Simultaneously, it encourages the reader both to see nonhuman animals afresh and to reimagine the terms of our

relationships with them Examining imaginative texts by writers such as Octavia Butler Philip K Dick Kazuo Ishiguro Jeanette Winterson and J M Coetzee this book looks at depictions of androids that redefine traditional humanist qualities such as hope and uniqueness It examines alien visions that unmask the racist and heteronormative roots of speciesism And it unpacks examples of ghosts and spirits who offer posthumous visions of having been human that decenter anthropocentrism In doing so it leaves open the potential for better relationships and futures with nonhuman animals

Broken Mirrors Joe Trotta,Zlatan Filipovic,Houman Sadri,2019-11-07 Dystopian stories and visions of the Apocalypse are nothing new however in recent years there has been a noticeable surge in the output of this type of theme in literature art comic books graphic novels video games TV shows etc The reasons for this are not exactly clear it may partly be as a result of post 9 11 anxieties the increasing incidence of extreme weather and or environmental anomalies chaotic fluctuations in the economy and the uncertain and shifting political landscape in the west in general Investigating this highly topical and pervasive theme from interdisciplinary perspectives this volume presents various angles on the main topic through critical analyses of selected works of fiction film TV shows video games and more

Multispecies Futures Roman Bartosch,Liza B. Bauer,Alexandra Böhm,Micha Gerrit Philipp Edlich,Greta Gaard,Björn Hayer,Andreas Hübner,Michaela Keck,Maria Moss,Jobst Paul,Mieke Roscher,Pamela Steen,Nils Steffensen,2022-06-14 In

light of the dramatic growth and rapid institutionalization of human animal studies in recent years it is somewhat surprising that only a small number of publications have proposed practical and theoretical approaches to teaching in this inter and transdisciplinary field. Featuring eleven original pedagogical interventions from the social sciences and the humanities as well as an epilogue from ecofeminist critic Greta Gaard, the present volume addresses this gap and responds to the demand by both educators and students for pedagogies appropriate for dealing with environmental crises. The theoretical and practical contributions collected here describe new ways of teaching human animal studies in different educational settings and institutional contexts, suggesting how learners equipped with key concepts such as agency or relationality can develop empathy and ethical regard for the more than human world and especially nonhuman animals. As the contributors to this volume show, these cognitive and affective goals can be achieved in many curricula in secondary and tertiary education. By providing learners with the tools to challenge human exceptionalism in its various guises and related patterns of domination and exploitation in and outside the classroom, these interventions also contribute to a much needed transformation not only of today's educational systems but of society as a whole. This volume is an invitation to beginners and experienced instructors alike: an invitation to reconsider how we teach human animal studies and how we could and should prepare learners for an uncertain future in ideally a more egalitarian and just multispecies world. With contributions by Roman Bartosch, Liza B. Bauer, Alexandra B. H. Michä, Gerrit Philipp Edlich, Greta Gaard, Björn Hayer, Andreas H. Bner, Michaela Keck, Maria Moss, Jobst Paul Mieke, Roscher, Pamela Steen, and Nils Steffensen.

Animals and Science Fiction, Nora Castle, Giulia Champion, 2024-03-22

Animals and Science Fiction is the first edited collection to be published focusing on the intersection of animal studies and science fiction studies. It offers a broad range of theoretical approaches and primary source texts including novels, short stories, poetry, film, and TV, photography, erotica, video games, and urban planning documents that explore the ways works of science fiction can transform how we see and interact with nonhuman others. With an eye toward more just multispecies futures, it argues that speculative imaginaries can be pivotal in changing attitudes toward and understandings of nonhuman animals in our world today. Chapters appeal to those interested in biopolitics, posthumanism, new materialism, ecocriticism, and the environmental humanities, ocean humanities, postcolonial studies, critical race studies, Indigenous studies, global sf studies, film studies, and food studies. Taken together, the collection works to showcase a diverse and growing field of scholarly inquiry into animals and science fiction.

Mundos Alternos, Robb Hernandez, Tyler Stallings, Joanna Szupinska, 2017

Mundos Alternos looks at science fiction in the Americas through a transcultural perspective grounded in an understanding of Latinidad expressed through shared hemispheric experiences in language, culture, and visual expression. If a Latin American science fiction is said to exist, the texts in this volume interrogate where that Latin America and its science fiction imagination might be located. In addition to focusing on specific regions in North, Central, and South America, the book's essays cross time and space, illuminating Soviet influence in Cuba, the impact of

American pop culture in Mexico and the cross pollination of European avant garde aesthetics in Brazil Mundos Alternos will be an indispensable resource for contemporary art curators working on Latin America science fiction scholars interested in visual interpretations of the genre and readers interested in science fiction art Latin America and the diaspora **Women in Science Fiction and Fantasy [2 Volumes]** Robin Anne Reid, 2008-12-30 Examines women's contributions to science fiction and fantasy across a range of media and genres such as fiction nonfiction film television art comics graphic novels and music **Bibliographie der deutschen Sprach- und Literaturwissenschaft**, 2011 **Stalking the Subject** Carrie L.
