$3 \times 14 = ?$  *I don't know! :/* Break 14 into  $9 + 5$

So now you can do  $(3 \times 9) + (3 \times 5) =$  *I know these! :)*

$$3 \times 9 = 27$$

$$\begin{array}{r} 3 \times 5 = 15 \\ \hline 42 \end{array}$$

## **Distributive Property Lesson Ideas:**

Basic Algebra and Geometry Made a Bit Easier Lesson Plans Larry Zafran, 2010 This is the fifth book in the Math Made a Bit Easier series by independent math tutor Larry Zafran. It contains 50 abridged lesson plans covering basic algebra and geometry for a target audience of tutors, parents, and homeschoolers. Each lesson plan includes all of the components of a typical classroom lesson such as aim, motivation, warm-up exercises, demonstrative examples, questions for thought and discussion, and connections to earlier and later material. This book is intended to be used in strict conjunction with the fourth book of the series, *Basic Algebra and Geometry Made a Bit Easier: Concepts Explained in Plain English*. The book assumes that the instructor actually knows the material himself but could benefit from having a general guideline to follow. The author makes a point of identifying the concepts which most students tend to find easy or difficult, including suggestions on how to help with the latter. The book includes an introduction describing how the book can be put to best use, as well as a section on how to effectively work with students who are struggling with the material. The author explains that for the vast majority of students, the root of the problem can be traced back to never having fully mastered basic math concepts and skills. The book's lessons make frequent reference to reviewing earlier books in the series as needed, so that the student masters all of the prerequisite material.

*Lessons for Extending Multiplication* Maryann Wickett, Marilyn Burns, 2001. Lessons, games, and activities to increase children's multiplication skills.

*Better Lesson Plans, Better Lessons* Ben Curran, 2015-09-25. In today's high-stakes world, ready-made lessons and teacher's guides are no longer enough to guarantee achievement. The best way to help students succeed is through deliberate and careful lesson planning focused on the end result of increasing student achievement. Whether you are a new teacher or an experienced educator, this book will help you get started by providing a practical step-by-step guide to designing lessons that will lead to student mastery of any objective. You'll learn the essential components of lessons that are Common Core aligned and grounded in best practices. Topics include: Tailoring your lessons to meet your state standards while ensuring high student achievement; Writing a strong objective to stay focused on the goal of a lesson; Creating an end-of-lesson assessment to gauge the lesson's success; Constructing a lesson plan that combines direct instruction, guided practice, and independent practice. Along the way, you'll find plenty of helpful examples from math and English Language Arts. You'll also find end-of-chapter FAQs and activities to try to help you make these concepts a reality for your own classroom. Many of the tools from the book are also available as free downloads from our website: [www.routledge.com/books/details/9781138838871](http://www.routledge.com/books/details/9781138838871).
