Aboriginal Australian and Torres Strait Islanders

Direction

Aboriginal and Torres Strait Islander Peoples by being position markers in the sky. The Southern Cross constellation helps with directions, like knowing which way is south.

Weather

The Torres Strait Islanders look at the way the stars twinkle and their colour. This helps them understand that there are changes happening to the weather.

Bright blue and twinkling = a storm is coming.
Fast twinkling stars = a wind will start to blow.

Collecting Food

Australian Aboriginal people look to the sky to see when it is a good time to collect some foods. When the constellation called the 'Emu in the Sky' changes its position to look like it is running or sitting, the Australian Aboriginal people know when it is the time to hunt for emus or start collecting their eggs.

Reclaiming Space James S. J. Schwartz, Linda Billings, Erika Nesvold, 2023 Reclaiming Space is an innovative study of space travel's history legitimacy and future The NewSpace movement that presently dominates spaceflight culture is characterized by distinctly Western free market capitalist values and associated with the space ambitions of the super wealthy This book exists to incubate illuminate and illustrate a more diverse and inclusive conversation about space exploration Reclaiming Space asks What would space exploration be like if we prioritized or even simply acknowledged the perspectives and value systems of individuals who are disabled aren't white aren't male or aren't characteristically Western in their values What can these perspectives teach us all about space exploration and its value or even its potential for harm that cannot be easily recognized or appreciated under the NewSpace status quo And what should we be doing differently when it comes to space exploration The twenty seven original essays in this volume provide much needed perspective on

space exploration by offering counterpoints to mainstream thinking about space. Essays address subjects such as the history and development of spaceflight culture both within and outside the United States, the impact of science fiction and space art on how we conceptualize space, diverse cultural narratives and responses to space, and the ways space exploration might be leveraged in support of repairing injustices. *Reclaiming Space* also considers what our responsibilities might be as a spacefaring species in the distant future. Contributors include academics who research space exploration, spaceflight culture, space ethics, and space policy, as well as space artists and authors of award-winning science and speculative fiction. Written for space enthusiasts of all backgrounds, *Reclaiming Space* is an engaging, provocative volume of essays showcasing the perspectives of women, persons of color, and others who are typically left out of discussions of space exploration.

Indigenous Knowledge Marcia Langton, Aaron Corn, Samuel Curkpatrick, 2024-11-05. How are we to live well with others? How can we sustain abundant environments and nourishing cultures? How might connections to place and generations past strengthen our cultural, political, and economic futures? Indigenous knowledge traditions have been fundamental to human life in Australia for countless generations. They carry understandings of ancestral histories and exemplify beneficial behaviours for living well on country, managing environmental resources, and maintaining social cohesion. Australia has developed collaborative approaches to Indigenous Knowledge research that are unique in the global context. These approaches centre the wisdom of Indigenous knowledge holders across interdisciplinary fields of enquiry as diverse as medicine, health, and wellbeing, social and economic development, environmental management, agriculture, and horticulture, history, law, and the creative arts. *Indigenous Knowledge: Australian Perspectives* reveals how Indigenous ways of being and knowing are intricately tied to place, expressed through beauty and resonant with wisdom. It argues that the world's contemporary challenges can be addressed and socio-environmental diversity sustained through conversations with both our ancestral pasts and the ancestral futures that we leave behind.

Anthropocene Cosmographies James George Lowder, 2026-01-29. This book explores relationships between humans and outer space through a geographical lens in the context of the Anthropocene. Presenting a bold and diverse engagement with outer space, the book expands geographical understandings of outer space and reflects upon humankind's place in the cosmos, all the while shedding light on the linkages between human life and cosmic processes. Drawing upon literature from across the social sciences, the book offers an innovative interdisciplinary examination of outer space that is grounded in geographic thinking. By delving into a range of materialities and milieus, it unpacks how outer space is framed, encountered, and perceived by a variety of social and cultural actors. A new materialist methodology combined with a mixed methods approach is used to investigate meteorites, Dark Sky Parks, and science fiction films, an effort that invokes deep pasts, embodied presents, and speculative futures. In doing so, the book reveals the interrelatedness of human and cosmos whilst unsettling the Anthropocene as a bounded and contained planetary condition. The interdisciplinary nature of this book makes it appealing for anyone engaging with outer space and planetary

thinking This book will be of particular use to scholars and students in geography and the social studies of outer space as well as those with an interest in the Anthropocene new materialism and more than human studies The Witches' Runes Josephine Winter,Jason Tremain,2026-01-08 Master this Historic and Powerful Divinatory System Step By Step Rune by Rune First presented by famed occultist Dolores Ashcroft Nowicki the Witches Runes aka Stones O Leary are a set of ten marked stones that have traveled the world by way of occult teachers and students Now for the first time ever this obscure system of divination is presented in its original form for a general audience Josephine Winter and Jason Tremain present each rune in its own in depth chapter along with meditations and journal prompts Josephine and Jason encourage you to explore each rune s traditional meaning and how it connects with you on a personal level You will also learn how to create your own Witches Runes and interpret the symbol combinations Much simpler than tarot or the Elder Futhark runes anyone can pick up this system and find that the future is just a stone s throw away Land Air Sea Jennifer Ferng,Lauren Jacobi,2023-12-14 Land Air Sea Architecture and Environment in the Early Modern Era positions the long Renaissance and eighteenth century as being vital for understanding how many of the concerns present in contemporary debates on climate change and sustainability originated in earlier centuries Traversing three physical and intellectual domains Land Air Sea consists of case studies examining how questions of environmentalism were formulated in early modern architecture and the built environment Addressing emergent technologies indigenous cultural beliefs natural philosophy and political statecraft this book aims to recast our modernist conceptions of what buildings are by uncovering early modern epistemologies that redefined human impact on the habitable world Australian Aboriginal Studies ,2004 **Guide to Reference Books** Robert Balay,Vee Friesner Carrington,Murray S.
