## **Big Bjarke Ingels Group:**

**BIG Bjarke Ingels Group,2012**    **Strategies in Action** Lise Justesen,    **Sustainable Architecture - Between Measurement and Meaning** Carmela Cucuzzella,Sherif Goubran,2021-01-05 Each day new articles books and reports present new methods standards and technologies for achieving sustainability in architecture Additionally new materials technological gadgets and data are increasingly considered the staples of architecture s future As we increasingly embrace this techno advancement we must be equally aware that we may be pushing architecture into a managerial science and away from its core concerns such as expression contextuality functionality and aesthetics Sustainable architecture that is focused on the abstract measurements of consumption energy and emissions loses sight of the vital role that architecture holds in our world it is the field that creates our public spaces and our places of dwelling of business of production of leisure and creation Additionally it fails to comprehend the human dimension of buildings as elements that are deeply connected to their sites historic contexts and that play a key role in defining our social relations and our connection to the spaces we occupy and utilize Sustainable Architecture Between Measurement and Meaning takes a step back to reflect on how sustainability in the built environment can be theorized and practiced critically This book exposes that architecture remains a human and social science that lies at the intersection of measurements and meanings It reveals that sustainable architecture can still operate in a dialectic space of expression rather than serving as a manifesto for either the technical or socio cultural extremes It purports that the human intuition senses and skills still holds the key to unravelling alternative futures of sustainable built spaces And that most importantly humans still have a place in sustainable architecture This book will be of interest to students early career scholars established researchers and practitioners studying sustainability in the built environment It can be used as a referencee to those in the fields of design architecture landscape and urban design urban studies geography social sciences and engineering

**Computing the Environment** Brady Peters,Terri Peters,2018-03-14 Computing the Environment presents practical workflows and guidance for designers to get feedback on their design using digital design tools on environmental performance Starting with an extensive state of the art survey of what top international offices are currently using in their design projects this book presents detailed descriptions of the tools algorithms and workflows used and discusses the theories that underlie these methods Project examples from Transsolar Klimaengineering Buro Happold s SMART Group Behnisch Behnisch Architects Thomas Herzog Autodesk Research are contextualized with quotes and references to key thinkers in this field such as Eric Winsberg Andrew Marsh Michelle Addington and Ali Malkawi

**New Museum Design** Laura Hourston Hanks,2021-04-28 New Museum Design provides a critical and compelling selective survey of contemporary international museum design since 2010 It provides an accessible and analytic review of the architectural landscape of museum and gallery design in the 2010s The book comprises twelve case study museum and gallery projects from across Europe Asia North America Africa the Middle East and Australia Each built example is interrogated through an

essay and a series of beautiful supporting illustrations and drawings Where appropriate architectural analysis is cross scale extending from consideration of the artefact s encounter with museum space at the most intimate scale through detailed architectural readings to the wider perspective of urban landscape response Similarly the book is not confined in its thematic or architectural typological scope including museums and art galleries as well as remodellings extensions and new build examples New Museum Design provides a critical snapshot of contemporary international museum architecture in order to better understand reasons for the state of current practice reveal and explore on going themes and approaches in the field and to point towards seminal future design directions This book is essential reading for any student or professional interested in museum design     *The Identity of the Architect* Laura Iloniemi,2019-12-23 Today there are more tools for communication than ever before yet very little in the way of reflection on how these are being used and even less on what exactly is being conveyed This issue of AD looks at how architecture is communicated from a cultural perspective Do the identities of practices or their business driven branding and promotional efforts resonate with the critical acclaim many architects seek Has slick image led media coverage sold the profession short How is it possible to convey the less visual and haptic qualities of architecture Can architects be more creative in their communication efforts making these joyous on their own terms as Le Corbusier did so memorably Is there really a need to succumb to the world of corporate marketing processes and managerial business jargon The issue explores notions of editing and curating work in an age of data deluge and discusses social media as a genuinely alternative space for communication rather than for just repurposing and regurgitating information relayed The Identity of the Architect encourages the promotion of practices as an integral extension of the very culture they hope to engender through their work Contributors Stephen Bayley Caroline Cole Adam Nathaniel Furman Gabor Gallov Jonathan Glancey Justine Harvey Owen Hopkins Crispin Kelly Jay Merrick Robin Monotti Juhani Pallasmaa Vicky Richardson Jenny Sabin and Austin Williams Featured architects Ian Ritchie BIG MVRDV IF\_DO and Zaha Hadid Architects     **Nordic voices** Nordic Council of Ministers,2016-01-13 According to the Secretary General of the UN Ban Ki moon the countries of the Nordic Region are the strongest countries in the UN s 70 year history This is a fact that commands respect and strengthens you as a region he said The individuals in this book all of whom are active in various international arenas are testament to the great interest in the Nordic Region and the fact that the global Nordic voice is now perhaps more important than ever

*Bjarke Ingels Group Projects 2001-2010* BIG Bjarke Ingels Group,2011 As a team of architects designers builders and theoreticians BIG s reputation and success is well known and widely respected Architectural or urban design projects or in the research and development field they are known to actively respond with creative and progressive concepts This volume reveals their signature design philosophy through the detailed presentation of over 40 completed projects      ,2009

*Harbourscape* Hans Kiib,2007 At the urban scale the harbour is a grandiose meeting between the town and the fjord landscape representing an interesting interface between the local life and the big world Here we still have a great variety of

old and new architectural typologies This scenery calls for quality The waterfront is a common gift for all citizens and it has been the gateway for hopes for a better life and a meeting place between tradition and the new In 2005 the Harbourscape Aalborg workshop and conference took place at Aalborg University with the participation of 45 architects engineers and planners from Denmark Norway the Netherlands and the United Kingdom The aim was to develop visionary strategies and design proposals emphasising the concepts of the development and regeneration of the waterfront in Aalborg This book provides a comprehensive presentation of the different methodological approaches and the resulting design concepts The aim has been to investigate a full scale dialogue on concepts and architectural quality in the waterfront development among stakeholders in this process and to illustrate how different design based methods can serve as tools in the said process Harbourscape does not provide architectural solutions to well defined problems and projects It is an eye opener towards new concepts in waterfront development and the use of design based methods in regeneration projects provided by young architects as well as more experienced designers and academics

**Sustainable Development of Urban Environment and Building Material** Hui Li,Yan Feng Liu,Ming Guo,Rui Zhang,Jing Du,2011-10-24 Selected peer reviewed papers from the 4th International Conference on Technology of Architecture and Structure ICTAS 2011 September 22 24 2011 Xi an China
