**E Durkheim**

## **Bi Monthly 2014 Calendar:**

*The Impacts of Water Reforms in Rural and Urban China* Li Li,2025-07-30 This book provides a comprehensive examination of three key water reforms in China. By leveraging unique natural experiments and employing state of the art applied microeconometric methods this book offers robust insights into the causal links between water reforms and economic outcomes in China. The book covers three major reforms the rural drinking water program private sector participation in urban water supply and the adoption of Increasing Block Tariffs IBTs in the urban domestic water sector. It highlights how these reforms have shaped rural children's human capital development urban water utilities performance and urban residents water demand. Designed for academics researchers and graduate students in economics environmental policy and public administration this book also appeals to policymakers water sector professionals and development agencies in developing countries. The content is scholarly and research oriented providing valuable insights into water reform policies.

**NewSpace Systems Engineering** Ignacio Chechile,2021-01-20 This book provides a guide to engineering successful and reliable products for the NewSpace industry. By discussing both the challenges involved in designing technical artefacts and the challenges of growing an organisation the book presents a unique approach to the topic. New Space Systems Engineering explores numerous difficulties encountered when designing a space system from scratch on limited budgets non existing processes and great deal of organizational fluidity and emergence. It combines technical topics related to design such as system requirements modular architectures and system integration with topics related to organizational design complexity systems thinking design thinking and a model based systems engineering. Its integrated approach mean this book will be of interest to researchers engineers investors and early stage space companies alike. It will help New Space founders and professionals develop their technologies and business practices leading to more robust companies and engineering development.

**Sourcebook on the Foundations of Social Protection Delivery Systems** Kathy Lindert,Tina George Karippacheril,Inés Rodríguez Caillava,Kenichi Nishikawa Chávez,2020-10-29 The Sourcebook on the Foundations of Social Protection Delivery Systems synthesizes real world experiences and lessons learned of social protection delivery systems from around the globe. It takes a broad view of social protection covering various intended populations such as poor or low income families unemployed workers persons with disabilities and individuals facing social risks. It discusses many types of interventions that governments provide to individuals families or households including categorical programs poverty targeted programs labor benefits and services disability benefits and services and social services. The Sourcebook seeks to address concrete how to questions including How do countries deliver social protection benefits and services How do they do so

effectively and efficiently How do they ensure dynamic inclusion especially for the most vulnerable and needy How do they promote better coordination and integration not only among social protection programs but also among programs in other parts of government How can they meet the needs of their intended populations and provide a better client experience The delivery systems framework elaborates on the key elements of that operating environment The framework is anchored in core implementation phases along the delivery chain Key actors including people and institutions interact all along that delivery chain Those interactions are facilitated by communications information systems and technology This framework can apply to the delivery of one or many programs and to the delivery of adaptive social protection The Sourcebook structures itself around eight key principles that can frame the delivery systems mind set 1 There is no single blueprint for delivery systems but there are commonalities and those common elements constitute the core of the delivery systems framework 2 Quality of implementation matters and weaknesses in any of the core elements will negatively affect the entire system reducing the impacts of the programs they support 3 Delivery systems evolve over time in a nonlinear fashion and their starting points matter 4 Efforts should be made to keep it simple and to do simple well from the start 5 The first mile people's direct interface with administrative functions is often the weakest link in the delivery chain improving it may take systemic change but will greatly improve overall efficiencies and mitigate the risk of failures on the frontlines 6 Social protection programs do not operate in a vacuum and thus their delivery systems should not be developed in silos synergies across institutions and information systems are possible and can improve program outcomes 7 Social protection delivery systems can contribute more broadly to government's ability to serve other sectors such as health insurance subsidies scholarships social energy tariffs housing benefits and legal services 8 The dual challenges of inclusion and coordination are pervasive and perennial and encourage the continuous improvement of delivery systems through a dynamic integrated and human centered approach
