Balgos, 2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy All chapters follow a common framework for policy analysis While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and

ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992 2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world *An IUCN situation analysis of terrestrial and freshwater fauna in West and Central Africa*, 2015-06-01 This situation analysis was undertaken to inform responses to several resolutions made at the 5th World Conservation Congress in 2012 about the plight of large vertebrates in West and Central Africa It draws on a wide range of information to provide information on the status of these species important sites pressures legislation the effectiveness of protected areas and both community based incentives for conservation and institutional responses The overriding conclusion is of substantial wildlife declines and inadequate responses to either long standing pressures or rapidly escalating threats that have emerged in recent years
