Achieving the Health-related Millennium Development Goals in the South-East Asia Region Who Regional Office for South-East Asia, 2015 Member States of the World Health Organization WHO South East Asia Region have made considerable efforts to provide an extra surge towards achieving the targets set by the United Nations UN Millennium Declaration in 2000 the core values of which are enshrined in the Millennium Development Goals MDGs Since 2000 these goals have been an important yardstick for the international community to measure its progress on selected vital health and socioeconomic indices Tracking and measuring the progress towards achieving the MDGs has been a challenge for individual countries as well as the global community To operationalize and monitor progress towards achieving the MDGs at the sub national level stratified as it is by various socioeconomic factors and to navigate down to the male and female halves of the population is an even greater challenge This publication presents the achievements made on the MDGs by Member States of the WHO South East Asia Region gauged only at the national level It depicts the road covered by countries in the last 12 years and the gaps that have to be bridged in the remaining 3 years and ascertains the likelihood of reaching each of the targets by 2015 The report also highlights the bottlenecks the most intense challenge and the constraints faced by each country in its strategic actions and interventions To comply with the recommendations of UN Secretary General s Commission on Information and Accountability for Women s and Children s Health this publication also presents an analysis of the related MDG indicators on women s and children s health

[Routledge Handbook of Global Public Health in Asia](#) Siân M. Griffiths, Jin Ling Tang, Eng Kiong Yeoh, 2014-04-16 Global public health is of growing concern to most governments and populations nowhere more so than in Asia the world s largest and most populous continent Whilst major advances have been made in controlling infectious diseases through public health measures as well as clinical medical treatments the world now faces other challenges including ageing populations and the epidemic crisis of obesity and non communicable diseases New emerging infections continue to develop and the growing threats to health due to environmental pollution and climate change increase the need for resilience and sustainability These threats to health are global in nature and this Handbook will explore perspectives on current public health issues in South Southeast and East Asia informing global as well as regional debate Whilst many books cite Western examples of the development of global public health this Handbook brings together both Western and Eastern scholarship

creating a new global public health perspective suitable to face modern challenges in promoting the population's health. This Handbook is essential reading not only for students, professionals and scholars of global public health and related fields but is also written to be accessible to those with a general interest in the health of Asia. *Selected Speeches* Pranab

Mukherjee, 2015 *Governing through Goals* Norichika Kanai, Frank Biermann, 2017-05-12 A detailed examination of the UN's Sustainable Development Goals and the shift in governance strategy they represent. In September 2015 the United Nations General Assembly adopted the Sustainable Development Goals as part of the 2030 Agenda for Sustainable Development. The Sustainable Development Goals built on and broadened the earlier Millennium Development Goals but they also signaled a larger shift in governance strategies. The seventeen goals add detailed content to the concept of sustainable development, identify specific targets for each goal and help frame a broader, more coherent and transformative 2030 agenda. The Sustainable Development Goals aim to build a universal integrated framework for action that reflects the economic, social and planetary complexities of the twenty first century. This book examines in detail the core characteristics of goal setting, asking when it is an appropriate governance strategy and how it differs from other approaches, analyzes the conditions under which a goal oriented agenda can enable progress toward desired ends and considers the practical challenges in implementation. Contributors: Dora Almassy, Steinar Andresen, Noura Bakkour, Steven Bernstein, Frank Biermann, Thierry Giordano, Aarti Gupta, Joyeeta Gupta, Peter M Haas, Masahiko Iguchi, Norichika Kanai, Rakhyun E Kim, Marcel Kok, Kanako Morita, M. People, Planet, and Progress Beyond 2015, 2016-12-15 Second in the series of TERI's annual flagship publication on global sustainable development. *People, Planet, and Progress Beyond 2015* examines six critical issues of the Planet: climate change, ozone layer depletion, loss of biodiversity, desertification, unsustainable use of natural resources and environmental pollution; and six crucial issues of the People: food security and safety, health and well-being, education and learning, sustainable habitat, energy for all and social justice and equity. It reviews the progress made by various regions and countries of the world on each of these issues and analyses the challenges and opportunities ahead, particularly in the contexts of post-2015 global development agendas ushered by the Paris Climate Agreement, UN Sustainable Development Goals and Sendai Framework for Disaster Risk Reduction. The analysis is supported by primary data from authentic sources on a wide range of indicators that make the volume an invaluable resource material on contemporary discourses on global development.
