Achieving Leadership Excellence Through Intrapreneurship:

Achieving Leadership Excellence Through Intrapreneurship Haresh K. Patel, Bibhuti Bhushan Kar, 2015-09-07 Research says that by 2020 2/3rd of the Fortune 500 list will be comprised of new entrants. Every large corporation on the current list of Fortune 500 should fear being laid off from the list in this short span of 6 years and will struggle to stay relevant. Why are the large organizations fast becoming irrelevant? When a start up grows into a giant corporate, the entrepreneurial spirit of employees struggles for survival in the presence of a new organizational culture studded with bulky standardized processes. This obviously results in reduced speed of execution, lesser innovation, and increased overheads. The situation is not only a loss for the company but also for its employees who are depreciating the value of their resumes. Excellence with Intrapreneurship is the answer. The book would clearly highlight the above lose-lose situation to alert the company and its employees and encourage them to roll up their sleeves for embracing Intrapreneurial culture. Every CEO fears that employees may not work as hard as top leadership and the best solution to this challenge is to develop a culture where every employee acts as a CEO. The roadmap of Excellence with Intrapreneurship is based on developing a profound understanding of individual core values and nine core competencies of an Intrapreneur. This book uses real-time case studies and references from mythological stories to highlight each of the nine core Intrapreneurial competencies. The chosen case studies focus on everyday challenges in corporate life and attempt to make cases relevant to a broader audience. At large, the book also stays away from big and famous success stories as a broader audience may appreciate them but not necessarily connect with them. This book is intended for a broad audience from fresh recruits to senior leaders of large corporations and self-employed professionals to new entrepreneurs. The goal is to provide insights to the current situation and derive a structured way to think, feel, and act like an Intrapreneur.

The Search For Best Practices Rob Reider, 2014-11-28 The Search for Best Practices will help you do the right thing and in the right way in spite of organizational roadblocks. It gives a real how-to look to assist management and operations personnel to analyze their operations in a program of continuous improvements and on-going search for best practices so that each entity operates most economically, efficiently, and effectively tied into why the entity is in existence in the first place. Best practice techniques assist the company in identifying its critical problem areas and treating the cause and not the symptom. With sensible business principles as the hallmark for the company's quest for best practices, the company can be clear as to the direction of movement and avoid merely improving poor practices or matching competitors' less than desirable practices that is being less inefficient than competitors. Clear business principles that make sense to all levels of the organization allow the company to identify and develop the proper best practices. In this manner, everyone in the organization is moving in the same desired direction and singing from the same songbook. The viruses that corrupt a business organization can be widespread and quite contagious. Nouveau quick fixes may be okay in the short term but over the long haul, the company needs to know what they are doing. If the company doesn't some other
