Acid In The Environment Lessons Learned And Future Prospects:

Acid in the Environment Gerald R. Visgilio,Diana M. Whitelaw,2007-04-13 The Goodwin Niering Center for Conservation Biology and Environmental Studies at Connecticut College is a comprehensive interdisciplinary program that builds on one of the nation's leading undergraduate environmental studies programs. The Center fosters research education and curriculum development aimed at understanding contemporary ecological challenges. One of the major goals of the Goodwin Niering Center involves enhancing the understanding of both the College community and the general public with respect to ecological, political, social and economic factors that affect natural resource use. To this end the Center has offered five conferences at which academicians, representatives of federal and state government and individuals from non-government environmental organizations are brought together for an in-depth interdisciplinary evaluation of important environmental issues. On April 1 and 2 2005 the Center presented the Elizabeth Babbott Conant interdisciplinary conference on Acid in the Environment Lessons Learned and Future Prospects. The Connecticut Institute of Water Resources at the University of Connecticut, the Connecticut Chapter of The Nature Conservancy and the Connecticut Sea Grant College Program joined the Center as conference sponsors. During the past twenty five years acid rain, formally referred to as acid deposition, has been the focus of much political debate and scholarly research. Acid deposition occurs when important precursor pollutants such as sulfur dioxide (SO₂) and nitrogen oxides (NO) mix with water vapor and oxidants in the atmosphere and fall back to earth in either wet or dry form.

Beyond Resource Wars Shlomi Dinar,2011 An argument that resource scarcity and

environmental degradation can provide an impetus for cooperation among countries.

Saving Biological Diversity Robert A. Askins, Glenn D. Dreyer, Gerald R. Visgilio, Diana M. Whitelaw, 2008-09-22 The Goodwin Niering Center for Conservation Biology and Environmental Studies at Connecticut College is a comprehensive interdisciplinary program that builds on one of the nation's leading undergraduate environmental studies programs. The Center fosters research education and curriculum development aimed at understanding contemporary ecological challenges. One of the major goals of the Goodwin Niering Center is to enhance the understanding of both the College community and the general public with respect to ecological, political, social and economic factors that affect natural resource use and preservation of natural ecosystems. To this end the Center has offered six conferences at which academicians, representatives of federal and state government, people who depend on natural resources for their living and individuals from non-government environmental organizations were brought together for an in-depth interdisciplinary evaluation of important environmental issues. On April 6 and 7 2007 the Center presented the Elizabeth Babbott Conant interdisciplinary conference on Saving Biological Diversity: Weighing the Protection of Endangered Species vs. Entire Ecosystems. The Beaver Brook Foundation, Audubon Connecticut, the state office of the National Audubon Society, the Connecticut Chapter of The Nature Conservancy, Connecticut Forest and Park Association and the Connecticut Sea Grant College Program joined the Center as conference sponsors. During this two day conference we learned

about conservation and endangered species from a wider range of perspectives. Like all of the conferences sponsored by the Goodwin Niering Center this conference was broadly interdisciplinary with presentations by economists, political scientists and conservation biologists.

American Environmental Policy Daniel Press, 2015-02-27 More than 40 years after the United States launched bold efforts to curb pollution and waste American environmental management has stalled. Drawing extensively on recent environmental science, engineering, regulatory agency data and trade information.

Encyclopedia of Environmental Management, Four Volume Set Sven Erik Jorgensen, 2012-12-13 Winner of an Outstanding Academic Title Award from CHOICE Magazine. Encyclopedia of Environmental Management gives a comprehensive overview of environmental problems, their sources, their assessment and their solutions. Through in-depth entries and a topical table of contents, readers will quickly find answers to questions about specific pollution and management issues. Edited by the esteemed Sven Erik Jrgensen and an advisory board of renowned specialists, this four volume set shares insights from more than 500 contributors, all experts in their fields. The encyclopedia provides basic knowledge for an integrated and ecologically sound management system. Nearly 400 alphabetical entries cover everything from air, soil and water pollution to agriculture, energy, global pollution, toxic substances and general pollution problems. Using a topical table of contents, readers can also search for entries according to the type of problem and the methodology. This allows readers to see the overall picture at a glance and find answers to the core questions: What is the pollution problem and what are its sources? What is the big picture or what background knowledge do we need? How can we diagnose the problem both qualitatively and quantitatively using monitoring and ecological models, indicators and services? How can we solve the problem with environmental technology, ecotechnology, cleaner technology and environmental legislation? How do we address the problem as part of an integrated management strategy? This accessible encyclopedia examines the entire spectrum of tools available for environmental management. An indispensable resource, it guides environmental managers to find the best possible solutions to the myriad pollution problems they face.
