Acoustic Communication In Insects And Anurans:

Acoustic Communication in Insects and Anurans H. Carl Gerhardt, Franz Huber, 2002-07-15 Walk near woods or water on any spring or summer night and you will hear a bewildering and sometimes deafening chorus of frog toad and insect calls How are these calls produced What messages are encoded within the sounds and how do their intended recipients receive and decode these signals How does acoustic communication affect and reflect behavioral and evolutionary factors such as sexual selection and predator avoidance H Carl Gerhardt and Franz Huber address these questions among many others drawing on research from bioacoustics behavior neurobiology and evolutionary biology to present the first integrated approach to the study of acoustic communication in insects and anurans They highlight both the common solutions that these very different groups have evolved to shared challenges such as small size ectothermy cold bloodedness and noisy environments as well as the divergences that reflect the many differences in evolutionary history between the groups Throughout the book Gerhardt and Huber also provide helpful suggestions for future research *Papers from the Symposium on Acoustic Communication in Anurans and Insects* American Society of Zoologists, Meeting, 1994 Acoustic Communication in Anurans and Insects American Society of Zoologists, 1994 **Wildlife Review**, 1995 **The Journal of the Acoustical Society of America** Acoustical Society of America, 2006 **Bison Acoustic Communication in the Context of Sexual Selection** Megan Tompkins Wyman, 2009 Bioacoustics, 2008 **Journal of Comparative Physiology**, 2007 *The Journal of Experimental Biology*, 2009 ANURAN COMMUNICATION RYAN MICHAEL J, 2001-05-17 In this volume 25 scientists from around the world review the most recent advances in the study of how frogs and toads communicate The contributors who are experts in disciplines including animal behaviour developmental biology endocrinology evolution ecology and neurobiology examine this amphibian order s vocal visual and chemical signals the physiology and energetics of their production neural processing related behaviours and evolutionary implications As the chapters demonstrate research developments have led to further understanding of the role of the anuran larynx in sound production how the anuran brain recognizes sound and how both of these processes are influenced by the animal s physiological state The contributors also discuss male to male call strategies as well as how female preferences for call variation contribute to sexual selection speciation and hybridization The text presents material about kin recognition abilities and the surprising range of visual displays by tropical anurans and examines how the inherent structure of the auditory system might generate sensory biases that influence signal evolution Journal of Experimental Biology, 2006 Encyclopedia of Animal Behavior: G-P Michael D. Breed, Janice Moore, 2010 Entries examine a broad array of different species and behavior patterns using techniques that range from molecular approaches to the study of behavior to analyses of individuals populations species and ecosystems **The Australian Entomologist**, 1993 *Characterization and Behavioral Analyses of the Vibrational Songs of Three Congeneric Pentatomid Bugs, Chlorochroa Uhleri, C.
