Teaching Innovation in University Education: Case Studies and Main Practices Saura, Jose Ramon, 2022-06-17 In the last decade the development of new technologies has made innovation a fundamental pillar of education Teaching innovation includes the evolution of both teaching and learning models to drive improvements in educational methodologies

Teaching innovation is a pioneer in the understanding and comprehension of the different teaching methodologies and models developed in the academic area. Teaching innovation is a process that seeks validation in the academic and teaching communities at universities in order to promote the improvement and its practices and uses in the future characterized by digital development and data based methods. **Teaching Innovation in University Education Case Studies and Main Practices** features the major practices and case studies of teaching innovation developed in recent years at universities. It is a source on study cases focused on teaching innovation methodologies as well as on the identification of new technologies that will help the development of initiatives and practices focused on teaching innovation at higher education institutions. Covering topics such as didactic strategies, service learning and technology based gamification, this premier reference source is an indispensable resource for pre-service teachers, lecturers, students, faculty, administrators, libraries, entrepreneurs, researchers and academicians.

Diversity, Equity, and Inclusion for Mathematics and Science Education: Cases and Perspectives Lin, Cheng-Yao, Sun, Li, 2025-06-04. Diversity, equity, and inclusion (DEI) are critical pillars for transforming mathematics and science education. As classrooms diversify, the need to address systemic barriers and create inclusive learning environments becomes more urgent. Cases on DEI in STEM education highlight the real world challenges and strategies educators face in promoting equitable access to learning opportunities, dismantling biases, and empowering students from historically marginalized communities. Further exploration may reveal powerful teaching tools and catalyze reflective practice and institutional change, encouraging educators to critically examine their roles in shaping a more inclusive future in math and science. Cases on Diversity, Equity, and Inclusion for Mathematics and Science Education explores key issues and concepts related to diversity, equity, and inclusion in mathematics and science classrooms. It offers solutions and successful strategies for teaching and learning in mathematics and science. This book covers topics such as inclusive classrooms, K-12 education, pre-service teaching, and is a useful resource for educators, sociologists, academicians, researchers, and scientists.

ACS GENERAL CHEMISTRY STERLING. TEST PREP, 2022 **Visualization in Science Education** John K. Gilbert, 2006-03-30. **Visualization in Science Education** draws on the insights from cognitive psychology, science, and education by experts from Australia, Israel, Slovenia, UK, and USA. It unites these with the practice of science education, particularly the ever-increasing use of computer-managed modelling packages, especially in chemistry. The first section explores the significance and intellectual standing of visualization. The second section shows how the skills of visualization have been developed practically in science education. This is followed by accounts of how the educational value of visualization has been integrated into university courses in physics, genomics, and geology. The fourth section documents experimental work on the classroom assessment of visualization. An endpiece summarises some of the research and development needed if the contribution of this set of universal skills is to be fully exploited at all levels and in all science subjects.
