[Research Handbook on Innovation Governance for Emerging Economies](#) Stefan Kuhlmann, Gonzalo Ordóñez-Matamoros, 2017-01-27 Although in recent years some emerging economies have improved their performance in terms of R & D investment outputs and innovative capacity these countries are still blighted by extreme poverty inequality and social exclusion. Hence emerging countries are exposed to conditions which differ quite substantially from the dominant OECD model of innovation policy for development and welfare. This Research Handbook contributes to the debate by looking at how innovation theory policy and practice interact and explains different types of configurations in countries that are characterized by two contrasting but mutually reinforcing features systemic failure and resourcefulness. Focusing on innovation governance and public policies it aims to understand related governance failures and to explore options for alternative more efficient approaches
