The question is why people developed over the suggested number of hours per week. Our own research has shown that there are many other factors involved in this. The Internet and the ease of access are the factors of importance in this particular area.

For each individual, the number of errors of each type, their nature and the manner in which they occurred, were recorded and agreed on by agreement. These results were to help the researcher to determine whether or not the test participants had or had not learned the new words prior to the memory test results. The next table presents the results.

However, results can hardly be taken seriously, as the number of observations is small and the data are not representative. The results of the experiments described above were obtained in the course of studies of the properties of the new materials. The following table summarizes the results of these experiments.

These are the first steps in the process of creating a new culture. Once the initial steps are taken, the culture can begin to grow and flourish. This is a process that takes time and effort. The key is to be patient and persistent.
