Paterno,2021-06-15 Director of the Chapman journalism program and mother of four recent college grads Susan F Paterno leads you through the admissions process to help you and your family make the best decision possible How is it possible that Harvard is more affordable for most American families than their local state university Or that up to half of eligible students receive no financial aid Or that public universities are rejecting homegrown middle and working class applicants and instead enrolling wealthy out of state students College admission has escalated into a high stakes game of emotional and financial survival How is the deck stacked against you And what can you do about it Susan F Paterno a veteran academic and journalist answers these questions and more in Game On Paterno helped her four very different kids navigate the application process to a wide range of colleges paying for their four year educations on a finite budget She incisively decodes the college admission industry the consultants the tutors the rankers the branding companies hawking advantage and arms you with the knowledge you need to make the system work for you You ll learn how to narrow your focus analyze who gets in and why and look for the right financial fit before considering anything else including geography reputation and especially ranking Among the tools and insights in Game On Why forty years of failed free market policies have led to skyrocketing tuition and historic levels of student debt Why applying to college has become a bewildering maze and how to find your way to a successful result Why college costs are more terrifying than you think How to read beyond the rack rate to negotiate the best financial package with the least debt Why merit is a myth but merit aid is essential The difference between family debt and student debt and how to split it A playbook for the Hunger Games of higher education Game On explains the anxiety uncertainty and chaos in college admission explodes the myth of meritocracy exposes the academy s connection to America s widening gap between rich and poor and provides strategies to beat and reform a broken system      *Are You Smart Enough?* Alexander W. Astin,2023-07-03 This book explores the many ways in which the obsession with being smart distorts the life of a typical college or university and how this obsession leads to a higher education that shortchanges the majority of students and by extension our society s

need for an educated population The author calls on his colleagues in higher education to return the focus to the true mission of developing the potential of each student However smart they are when they get to college both the student and the college should be able to show what they learned while there Unfortunately colleges and universities have embraced two very narrow definitions of smartness the course grade and especially the standardized test A large body of research shows that it will be very difficult for colleges to fulfill their stated mission unless they substantially broaden their conception to include student qualities such as leadership social responsibility honesty empathy and citizenship Specifically the book grapples with issues such as the following Why America s 3 000 plus colleges and universities have evolved into a hierarchical pecking order where institutions compete with each other to recruit smart students and where a handful of elite institutions at the top of the pecking order enroll the smartest students Why higher education favors its smartest students to the point where the not so smart students get second class treatment Why so many colleges find it difficult to make good on their commitment to affirmative action and equality of opportunity Why college faculties tend to value being smart more than developing students smartness i e teaching and learning

**Who Gets In and Why** Jeffrey Selinger, 2020-09-15 From award winning higher education journalist and New York Times bestselling author Jeffrey Selinger comes a revealing look from inside the admissions office one that identifies surprising strategies that will aid in the college search Getting into a top ranked college has never seemed more impossible with acceptance rates at some elite universities dipping into the single digits In *Who Gets In and Why* journalist and higher education expert Jeffrey Selinger dispels entrenched notions of how to compete and win at the admissions game and reveals that teenagers and parents have much to gain by broadening their notion of what qualifies as a

good college Hint it's not all about the sticker on the car window Selingo who was embedded in three different admissions offices a selective private university a leading liberal arts college and a flagship public campus closely observed gatekeepers as they made their often agonizing and sometimes life changing decisions He also followed select students and their parents and he traveled around the country meeting with high school counselors marketers behind the scenes consultants and college rankers While many have long believed that admissions is merit based rewarding the best students Who Gets In and Why presents a more complicated truth showing that who gets in is frequently more about the college's agenda than the applicant In a world where thousands of equally qualified students vie for a fixed number of spots at elite institutions admissions officers often make split second decisions based on a variety of factors like diversity money and ultimately whether a student will enroll if accepted One of the most insightful books ever about getting in and what higher education has become Who Gets In and Why not only provides an unusually intimate look at how admissions decisions get made but guides prospective students on how to honestly assess their strengths and match with the schools that will best serve their interests

**After the Education Wars** Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points

the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools
