[Teacher Leadership in International Contexts](#) Charles F. Webber, 2023-03-23 This book addresses the critical gaps among understandings of teacher leadership across organizational and cultural contexts. It challenges the use of the term teacher leadership as if there is a widely shared understanding of what it is and what it means for exercising influence and making decisions. The book describes how implicit meanings and competing assumptions about teacher leadership may contribute to uncertainty and confusion in school communities. The authors caution against the incorporation of teacher leadership in international policy-making discussions without adequate consideration of contextual, organizational, historical, and cultural differences that may lead to school community members struggling to accommodate the concept or worse, ignoring other frameworks for facilitating more culturally appropriate decision-making. This book shares the findings of research conducted in several North American, European, African, Latin American, and Australasian contexts as part of the International Study of Teacher Leadership. Study findings are used to posit contextualized conceptualizations of teacher leadership and to offer a perspective for positioning researchers and practitioners in the international teacher leadership discourse. **The Internal Coherence Framework** Michelle L. Forman, Elizabeth Leisy Stosich, Candice Bocala, 2021-02-17 The Internal Coherence Framework presents a system of research-based practices for assessing and developing the

conditions that support adult and student learning in schools Internal coherence is defined as the ability of educators in a school or system to connect and align resources to carry out an improvement strategy engage in collective learning and use that learning to provide students with richer educational opportunities The internal coherence framework featured in the book brings together three important domains of research leadership for learning organizational improvement and instructional efficacy School or system leaders who progress through this book with colleagues will develop a shared vision for ambitious teaching and learning anchored in the instructional core organize the work of the leadership and teacher teams to advance this vision and build psychologically safe team school and system cultures to support the risk taking and constructive challenges necessary to move schools or systems to the next level of performance At the heart of the book is a survey and rubric that can help schools better understand their strengths and weaknesses and the kinds of resources they need to support student learning The book blends theory and practice to bring tested wisdom to bear on critical issues of education leadership and professional learning
