Active Collaborative Education Journey Teaching:

Active Collaborative Education Judith Barak, Ariela Gidron, 2015-12-28 ACE Active Collaborative Education set out on its educational journey in October 2001. At the time graduates of the college were enthusiastically accepted in the field smoothly slipping into the school system and highly appreciated as good teachers. However, this situation did not please this book's contributors. They wanted to see ACE graduates as different teachers, agents of change and innovation in their classrooms as well as in the wider circles of their society. It is against this background that the ACE program came into being, subversive in spirit, focusing on the process as much as on its end results, on dialogue instead of on competition and on learning communities and participation as much as on individual engagement.

Exploring Heutagogy in Higher Education

Amnon Glassner, Shlomo Back, 2020-04-17 This book explores heutagogy, self-determined learning, a new approach to teaching and learning in higher education, and proposes a paradigm shift in teaching, learning, and the educational enterprise and ecosystem. The first part of the book presents the philosophical, psychological, and sociological foundations of heutagogy and describes lessons learned from prior experiences of its implementation. The second part presents a collaborative self-study of five heutagogy courses in higher education. The third discusses how the academic community can enhance the paradigm change and compares heutagogy to similar academic approaches. The concluding chapter of the book explores the question of what next and suggests some possible elaborations of heutagogy. At the beginning, it was very difficult for me to appreciate the course's mode of learning. All my life, I had learned in a traditional manner. Occasionally, I felt that I was being thrown into deep water without a lifeguard. But as the course progressed, I succeeded in letting go of my deeply rooted habits and discovered a new learning approach through which I found in myself a new learner. Student's reflection: this book suggests a novel approach to learning and education and will become a widely read one. Dr. Lisa Marie Blaschke, Carl von Ossietzky University of Oldenburg.

Teacher Education and the Political Matthew Clarke, Anne Phelan, 2017-01-12 Teacher Education and the Political is a striking book which addresses the nature and purpose of teacher education in a global context characterised by economic and political anxieties around declining productivity and social inclusion. These anxieties are manifested in recent policy developments such as the promotion of professional standards, the deregulation and marketisation of teacher education, and the imposition of performance-related regimes that tie teachers' pay to outcomes in high-stakes testing. The book assesses the implications of such policies for the work of teachers as well as for teacher educators and those undertaking initial teacher training. It is argued that these policy moves can be read as a depoliticising and de-intellectualising of teacher education. In this context, they illustrate how contemporary theory can provide a language for critiquing recent developments and imagining new trajectories for policy and practice in teacher education. Drawing on the work of theorists from Derrida and Mouffe to Agamben and Lacan, this book argues for the need to maintain a space for intellectual autonomy as a critical dimension of the ethico-political work of teachers. Together, these ideas and analyses

provide examples of the power of negative thinking illustrating its capacity to unsettle comfortable truths and foreground the political nature of teacher education Current teachers teacher educators and school leaders will be particularly interested readers alongside those concerned with policy in the wider educational landscape *The Professional Development of Teacher Educators* Tony Bates, Anja Swennen, Ken Jones, 2014-12-18 This book makes a significant contribution to a hitherto much neglected area The book brings together a wide range of papers on a scale rarely seen with a geographic spread that enhances our understanding of the complex journey undertaken by those who aspire to become teachers of teachers The authors from more than ten countries use a variety of approaches including narrative life history self study and empirical research to demonstrate the complexity of the transformative search by individuals to establish their professional identity as teacher educators The book offers fundamental and thoughtful critiques of current policy practice and examples of established structures specifically supporting the professional development of teacher educators that may well have a wider applicability Many of the authors are active and leading persons in the international fields of teacher education and of professional development The book considers novice teacher educators issues of transition identity development including research identity the facilitation and mentoring of teacher educators self study research including collaborative writing use of stories professional development within the context of curriculum and structural reform Becoming a teacher is recognised as a transformative search by individuals for their teaching identities Becoming a teacher educator often involves a more complex and longer journey but according to the many travel stories told here one that can be a deeply satisfying experience This book was published as a special issue of Professional Development in Education *An Arena for Educational Ideologies* Miriam Ben-Peretz, Sharon Feiman-Nemser, 2017-05-22 Educational processes are shaped by societal ideas and values Different ideologies shape the discourses content processes and pedagogies of teacher education processes The book includes cases or illustrations of teacher education in the Montessori Waldorf Reggio Emilia and Pistoia traditions as well as the democratic tradition embraced by the Kibbutz Movement in Israel Understanding the ideologies that constitute the basis of teacher education programs might predict some of the outcomes of diverse programs on one hand and serve the adaptation of teacher education to societal needs and requirements on the other hand Purposes of schooling the value of knowledge and the relationship between teacher education and the goals of a democratic society have to be clarified in order to improve education in the service of society and its future The work of schools depends on the interaction between content teacher and student Therefore the preparation of teachers becomes a central aspect of education Multidisciplinary Approach in Research Area (Volume-14) Chief Editor- Biplab Auddy, Editor- Dr. Mohiuddin Jainulabedin Shaikh, Dr. S.
