[Terrorist Risk in Urban Outdoor Built Environment](#) Gabriele Bernardini, Elena Cantatore, Fabio Fatiguso, Enrico Quagliarini, 2024-11-03 This open access book outlines the latest results in analysing assessing and managing terrorist risk in the urban outdoor built environment In detail contents refer to the outdoor Open Areas such as streets squares urban parks and other public spaces in our cities exposed to such violent events considering the physical elements and properties of the built environment and users PThe built environment features including layout use and management are combined with terrorist threats issues and user behaviours in emergency conditions to determine a set of complementary tools for the reduction of risk and increase of urban resilience The contents hence provide different levels of tool analysis for risk scenario definition risk assessment mitigation strategies design and effectiveness evaluation considering

traditional approaches about the issue along with simulation based approaches relying on understanding and representing user behaviors. This behavioural design approach offers the opportunity to manage the level of risk for specific real urban cases over going the normative limitations in Europe that are only referred to few countries and sometimes deal with the prevention of violent acts by intelligence activities as the exclusive way to face this issue. In addition the focus on the characters of cultural and historic places and their resilience is increasing by means of introduction of mitigation and compatible solutions providing a complementary chapter for the design of resilient cities in all of their peculiarities peripheries consolidated and historical. In this sense it is one of the first organized attempts to analyse the main limitations of current solutions in these outdoor Open Areas and at the same time to clearly introduce the importance of human behaviours and the various choices in emergency evacuation conditions thanks to the proposed behavioural based simulation approach. The attention is focused on a critical aspect for historic spaces where morphological conditions are fixed values. Thus this book represents a sort of guidelines about these user related issues during such violent events and is useful to both professionals and researchers in the areas of security and urban administration.
